

Aladdin Pro Wallet Registration and User Manual

**aladdin
pro**

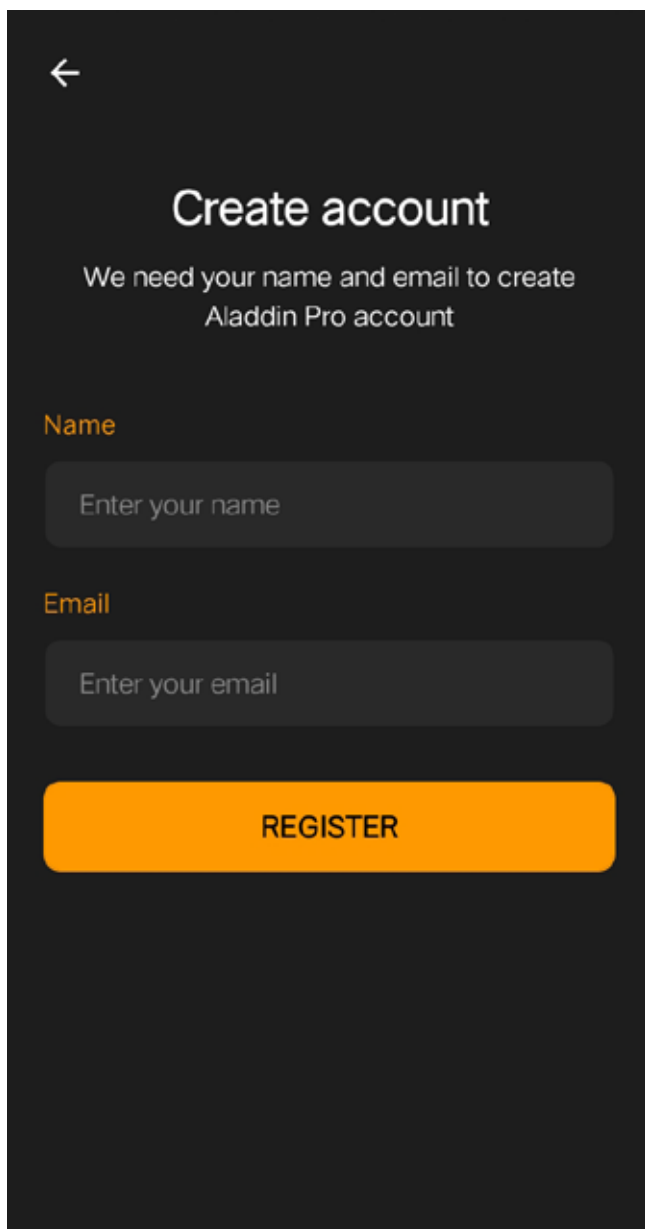

Aladdin Pro Wallet is a perfect wallet for users who want to have an additional layer of security on their cryptocurrency wallet.

1. This is the first page of the new Aladdin Pro Wallet.
2. Users can create a new account or sign in to an existing account.

How to Create an Account

1. Users must register by providing their name and email address.
2. This is a one-time process after installation.

Email Verification

1. Email verification will be sent to the email account used for registration.

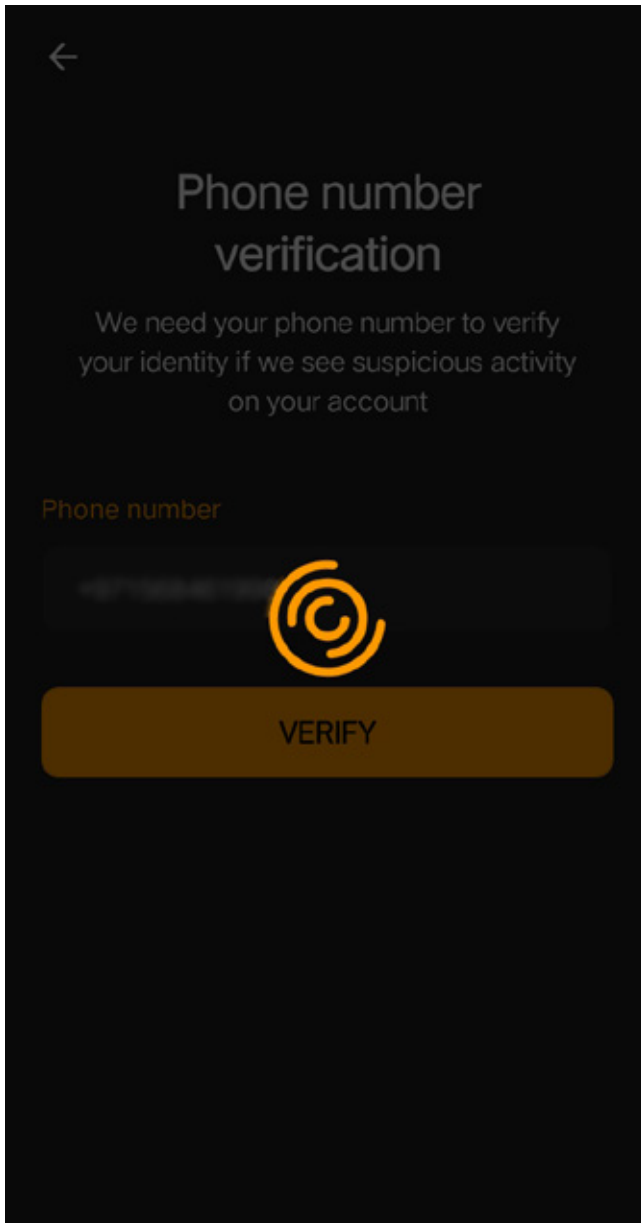

2. Users must input the verification code on the wallet to confirm the email.

Note: For added protection, users will receive a verification code on their email every time a login attempt was made on their account.

Phone Verification

1. Enter your mobile number including the [+] symbol and your country code. [e.g. +821012345678]
2. Users must input the verification code sent via SMS to confirm the mobile number.

Note: For added protection, users will receive a verification code on their mobile number every time a login attempt was made on their account.

Mnemonic Phrase

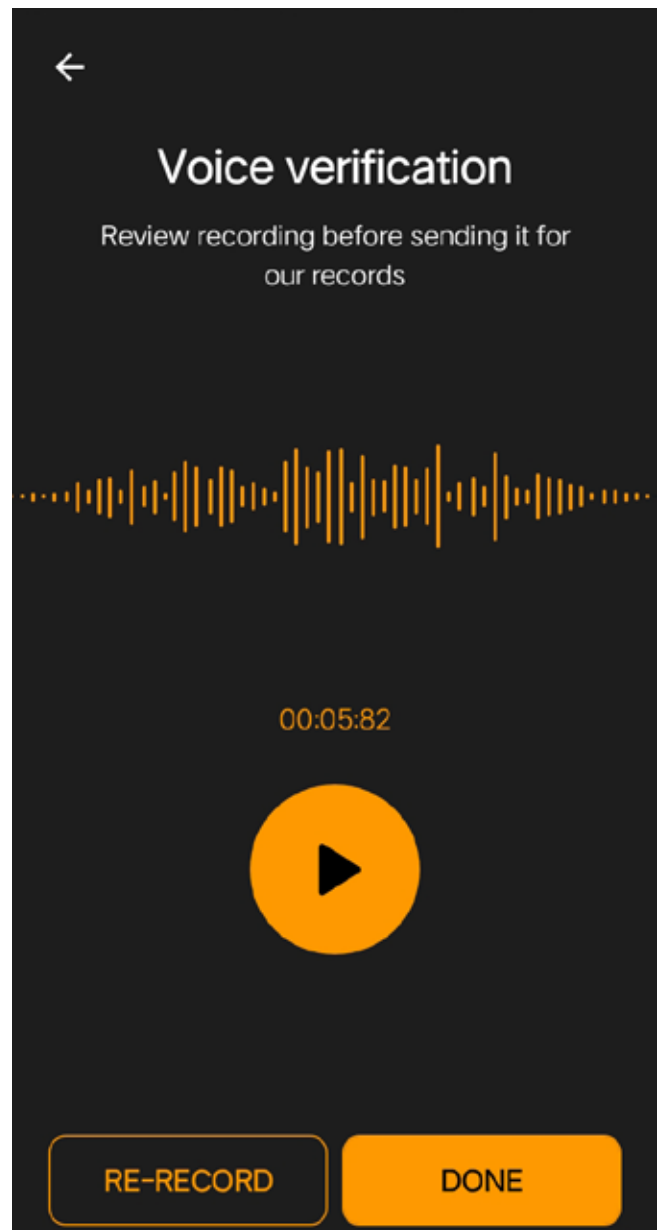

1. A unique mnemonic phrase will be generated for every user. Users must secure a copy of their own mnemonic phrase.
2. Users can click 'copy to clipboard' to easily save it on their phone or write it down on a paper for better security.

Note: Please remember to keep your mnemonic phrase in a very safe place and DO NOT share it with anyone else.

Voice Verification

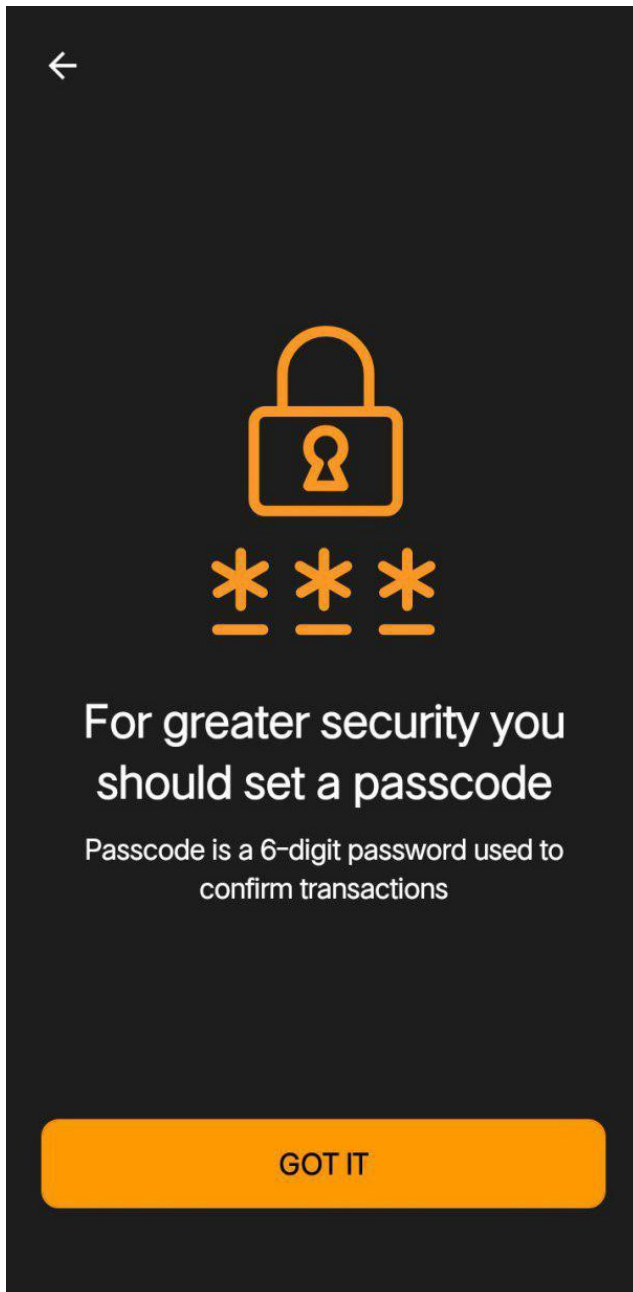

1. This additional security feature can be used by Aladdin Pro Wallet's admins to verify the authenticity of the user.
2. Tap the record button to start recording your voice sample.
3. Read the provided phrase in a clear and moderate voice.

*** For Korean users, you will be able to see the sentence in Korean.

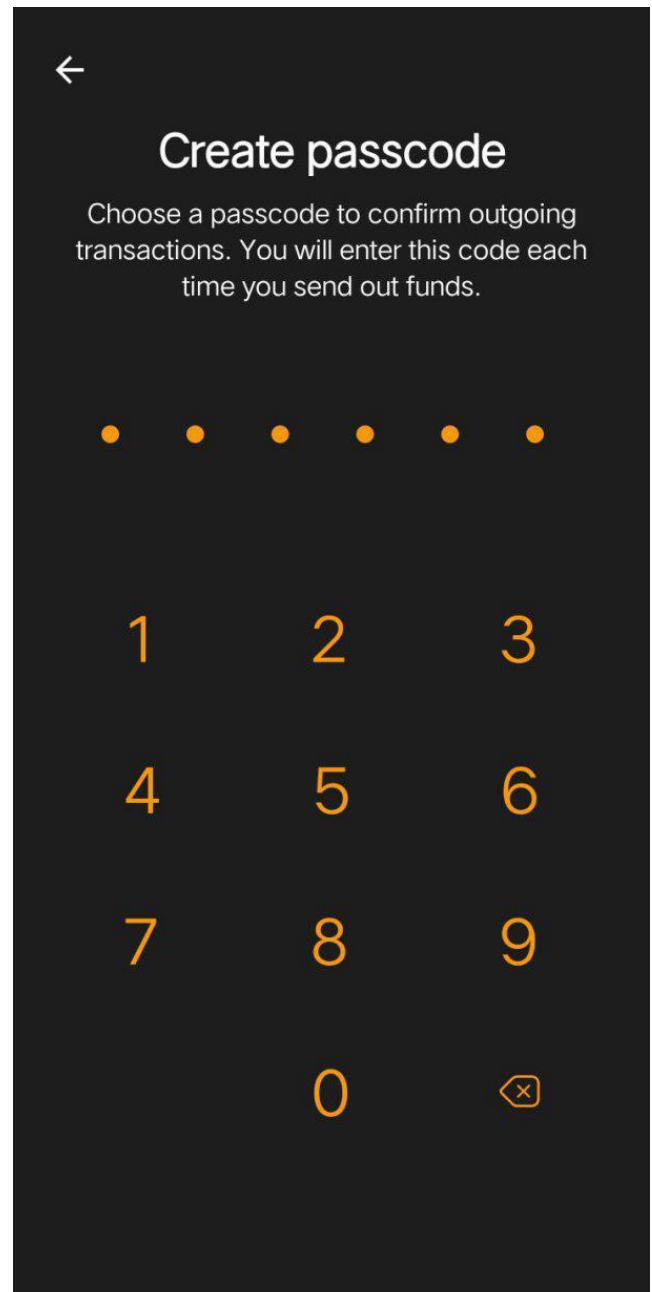

Note: Users must submit a clear and understandable voice recording. If not, click 're-record' to record a new voice recording.

Application Passcode

1. Users must set up an additional application passcode that will be used to confirm outgoing transactions.

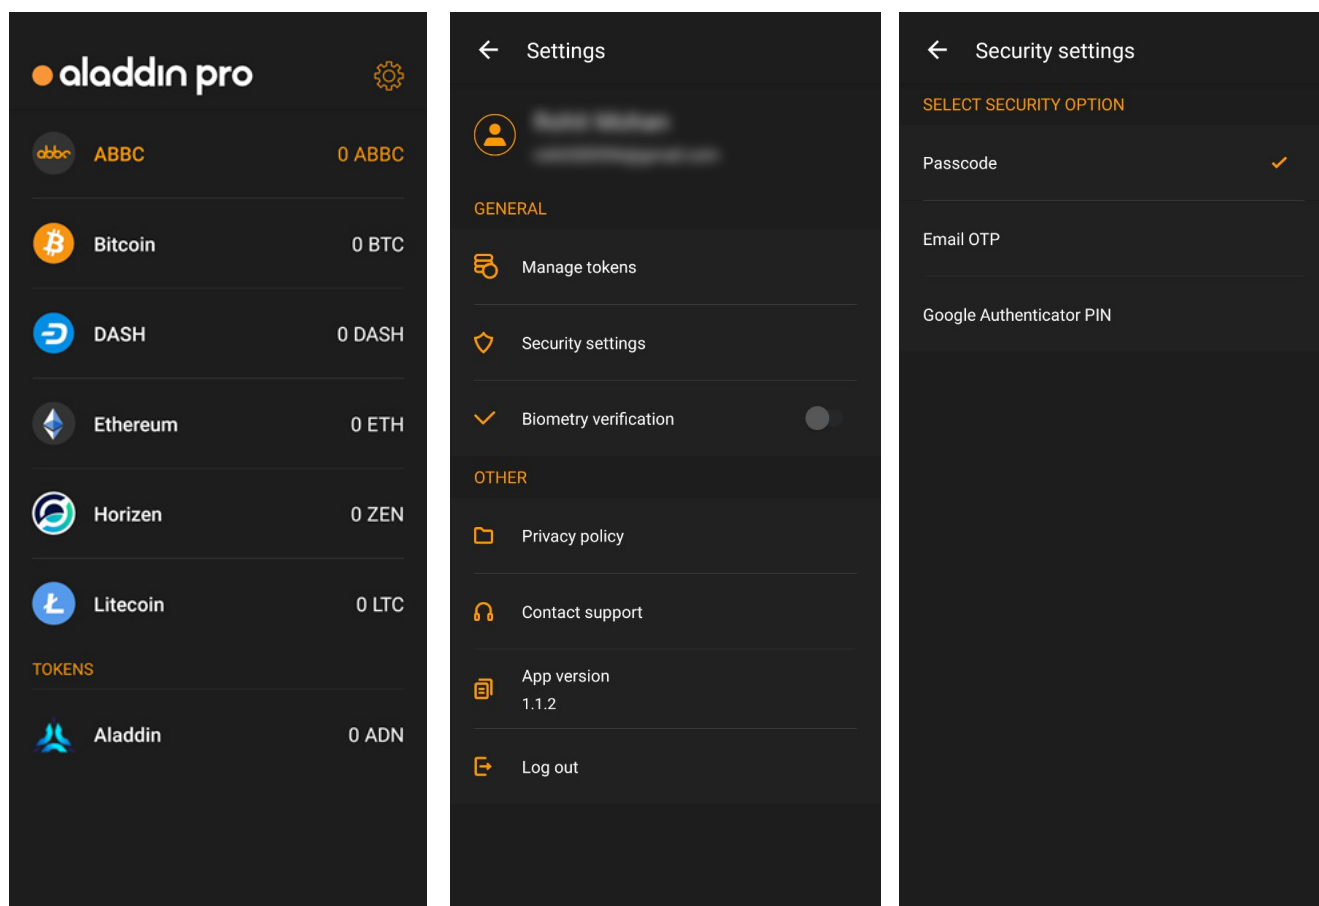

2. Enter a 6-digit passcode to proceed.

Congratulations, you have successfully created an account.
You can now start sending and receiving funds.

How to Change Your Security Settings

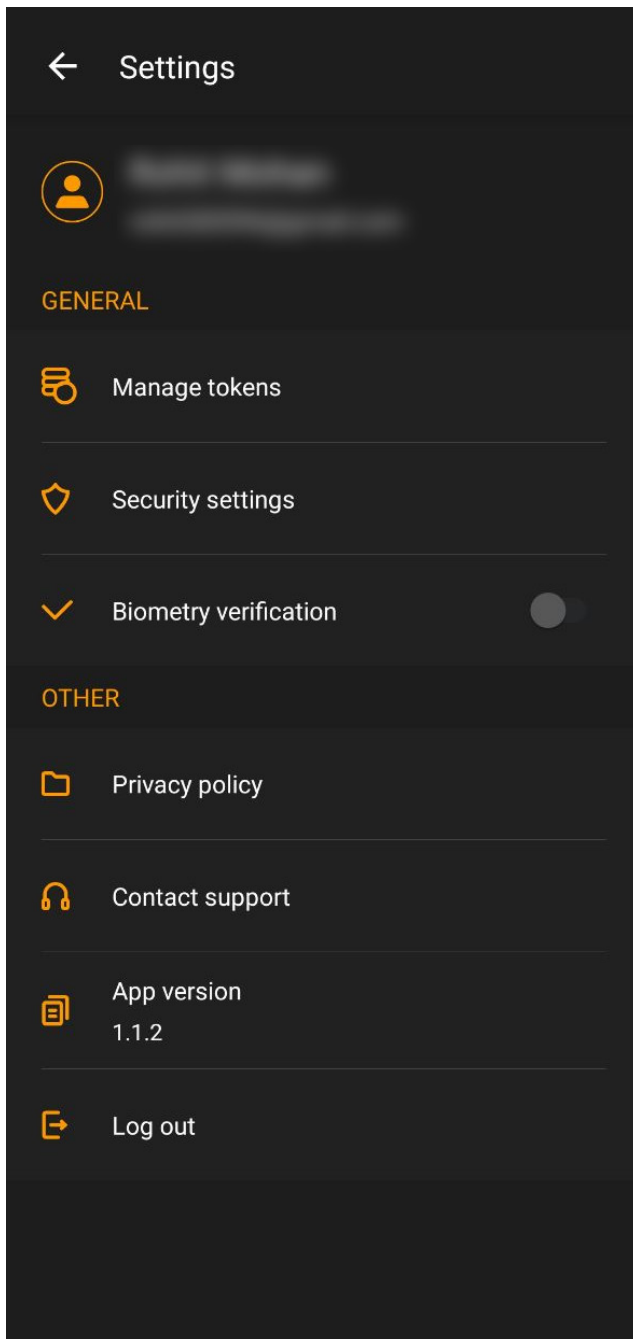

Aladdin Pro has additional security features to safeguard the users' assets. Users can choose which security option to use when sending cryptocurrency.

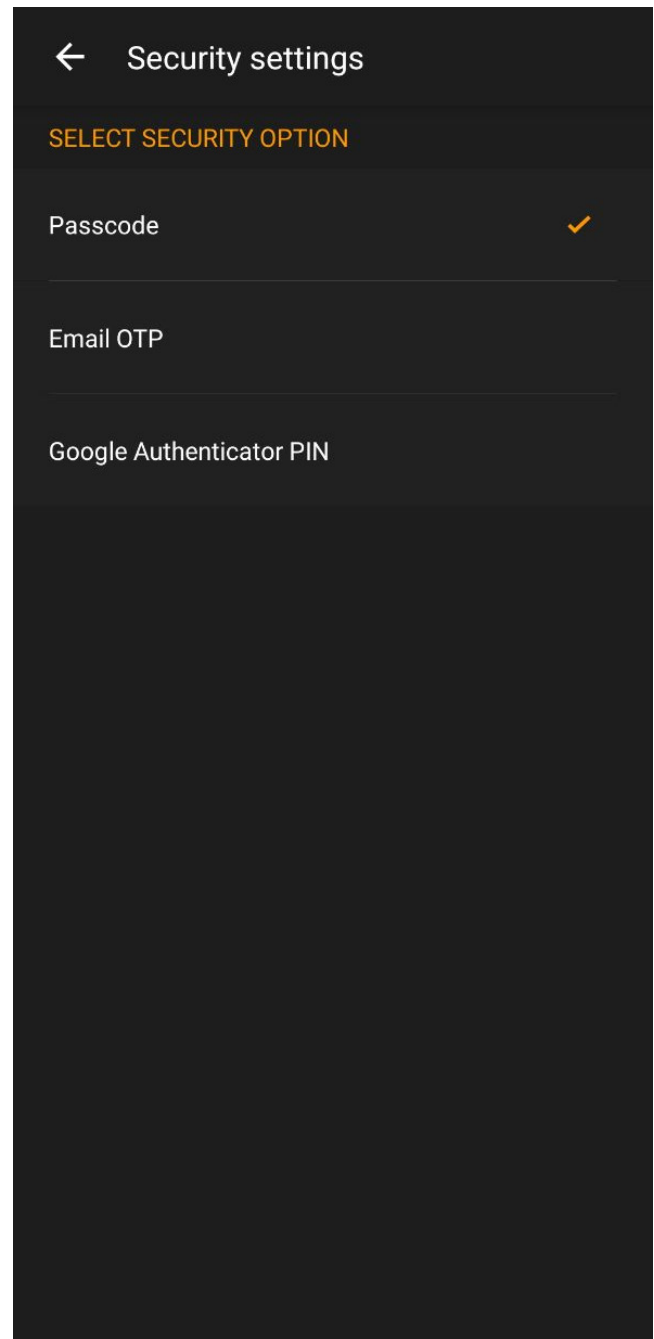

1. Click the General Settings icon on the top right corner.
2. Choose "Security settings" and select which of the three options you would like to use:
 - Passcode (this is set by default)
 - Email One-Time Passcode (OTP), or
 - Google Authenticator PIN

Important Note: When changing your security option for the first time, you will be asked to input the initial Application Passcode you have set upon creating your Aladdin Pro account. Otherwise, the most recent security option you have selected will be required to change your security settings.

How to Change Passcode

1. Click "Security settings".

2. Select "Passcode".

- 4.** Set your new passcode.

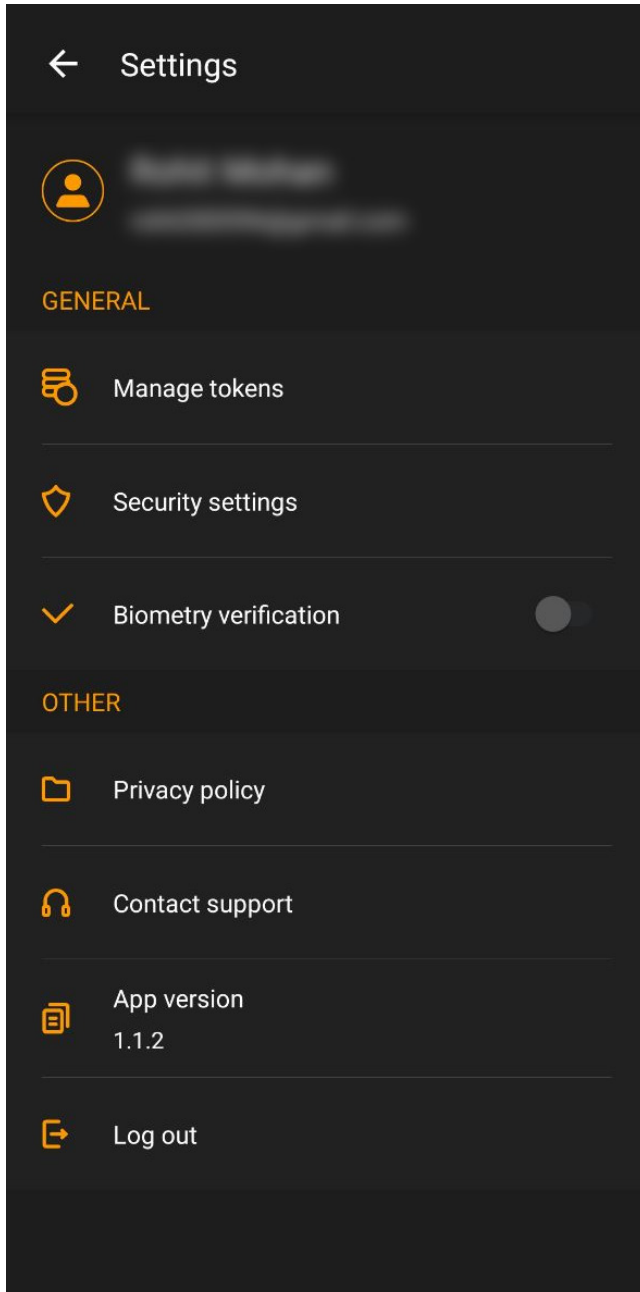

5. Retype the new passcode to confirm.

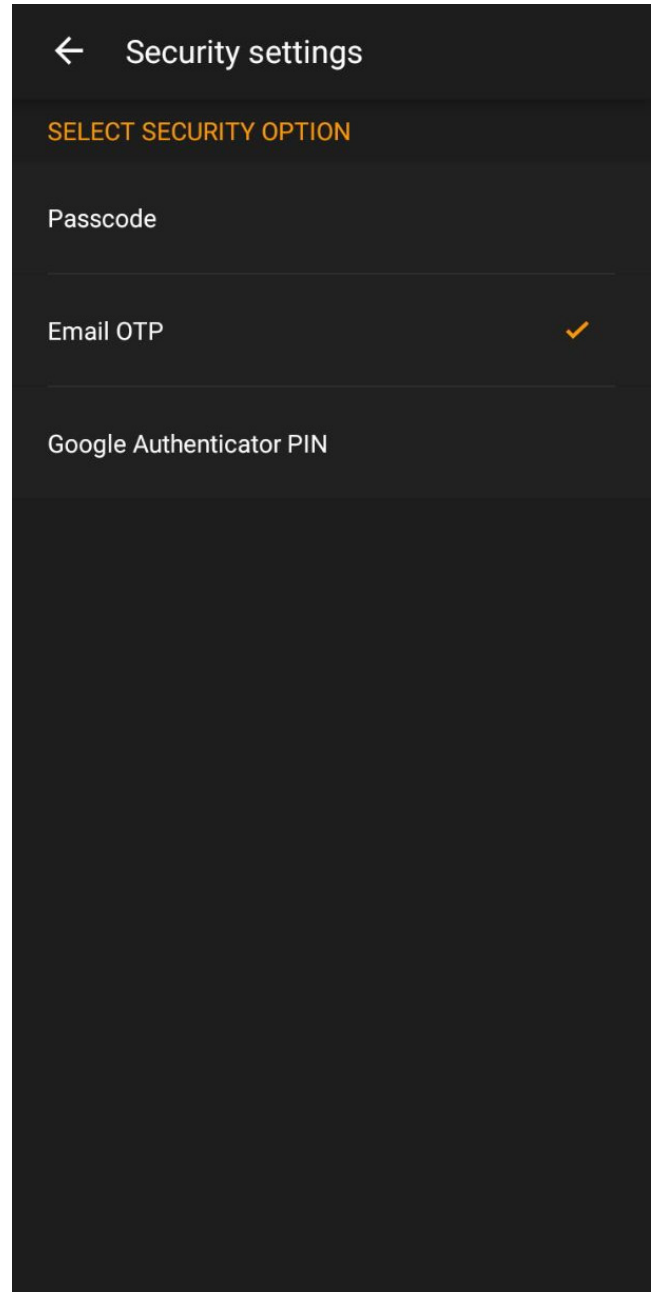

Success! You may now use your new passcode for all Aladdin Pro wallet transactions moving forward.

Note: Make sure to remember the new passcode as the system will not accept your old (previous) passcode any longer.

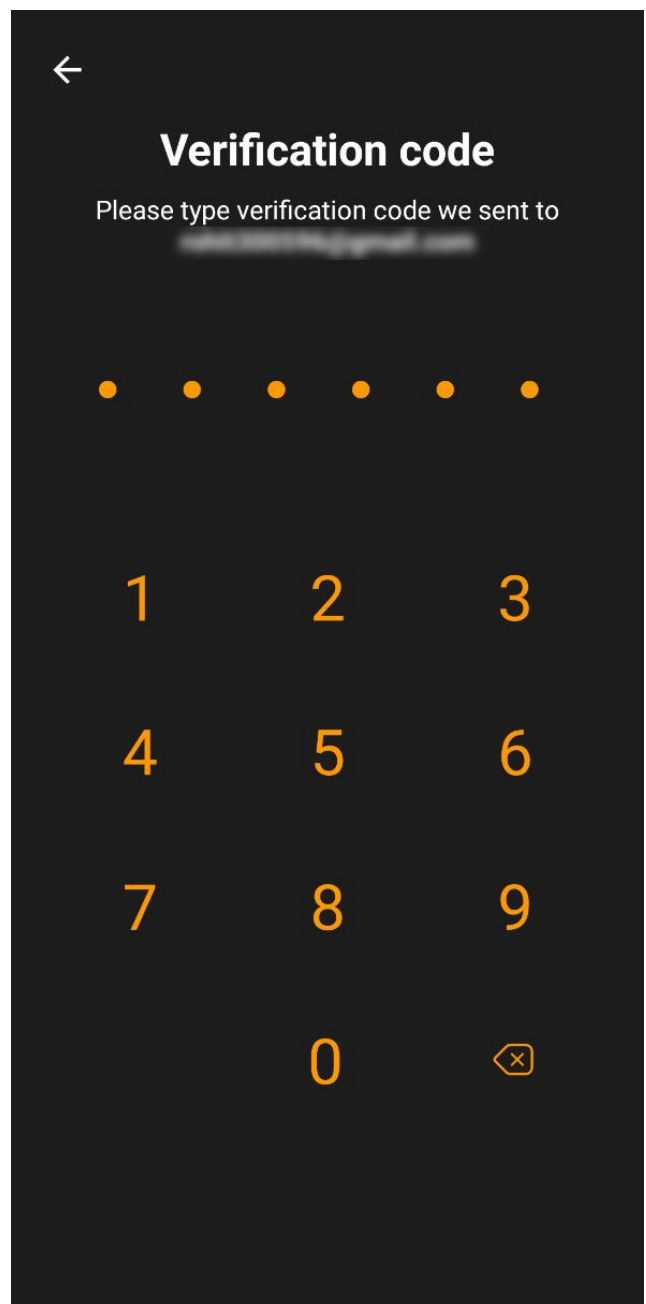

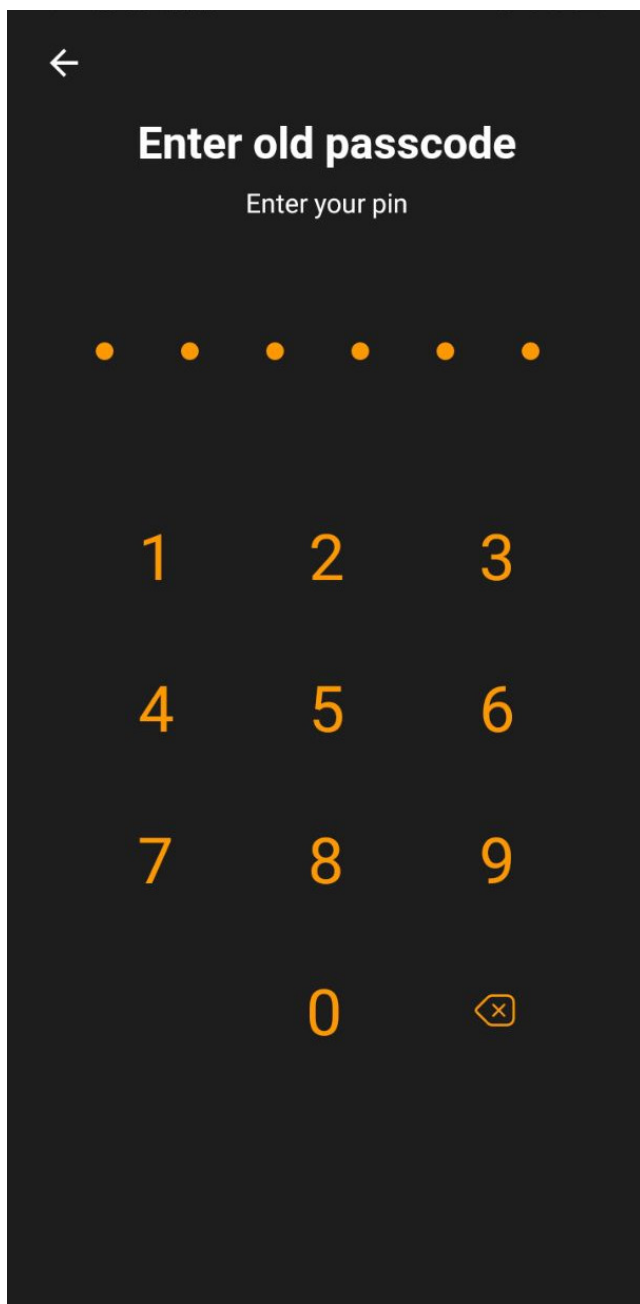

How to Set up Email One-Time Passcode (OTP)

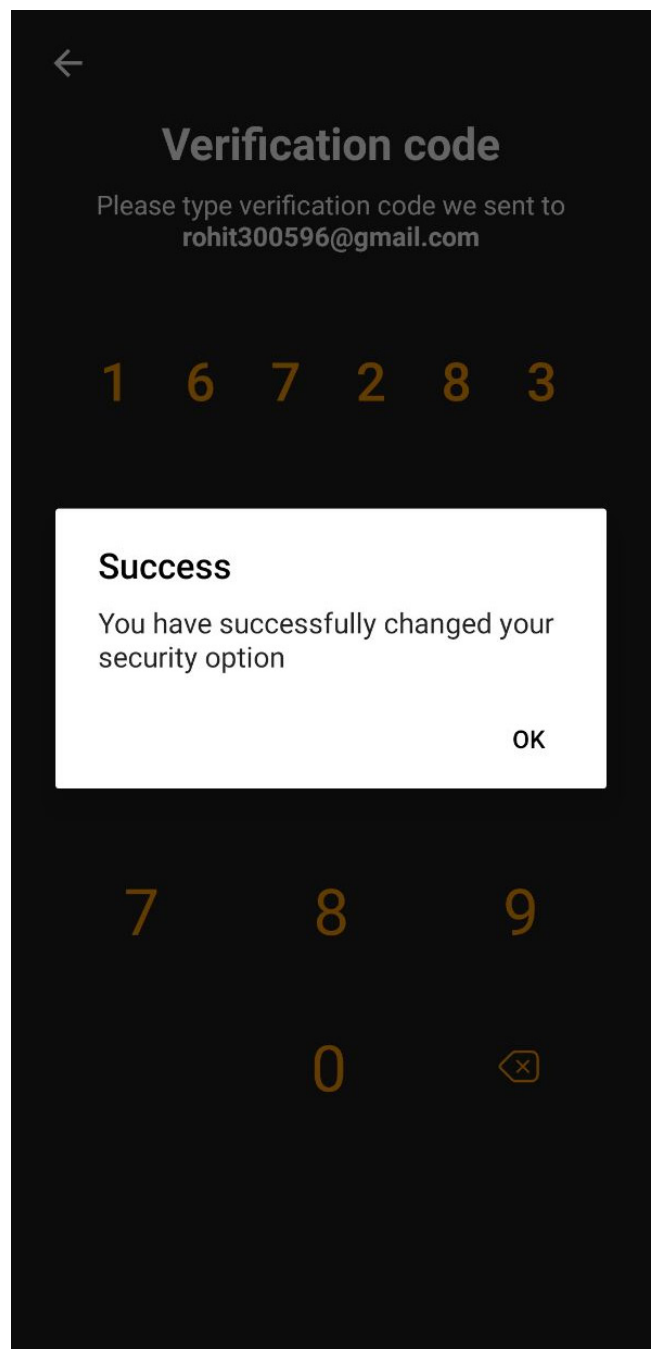

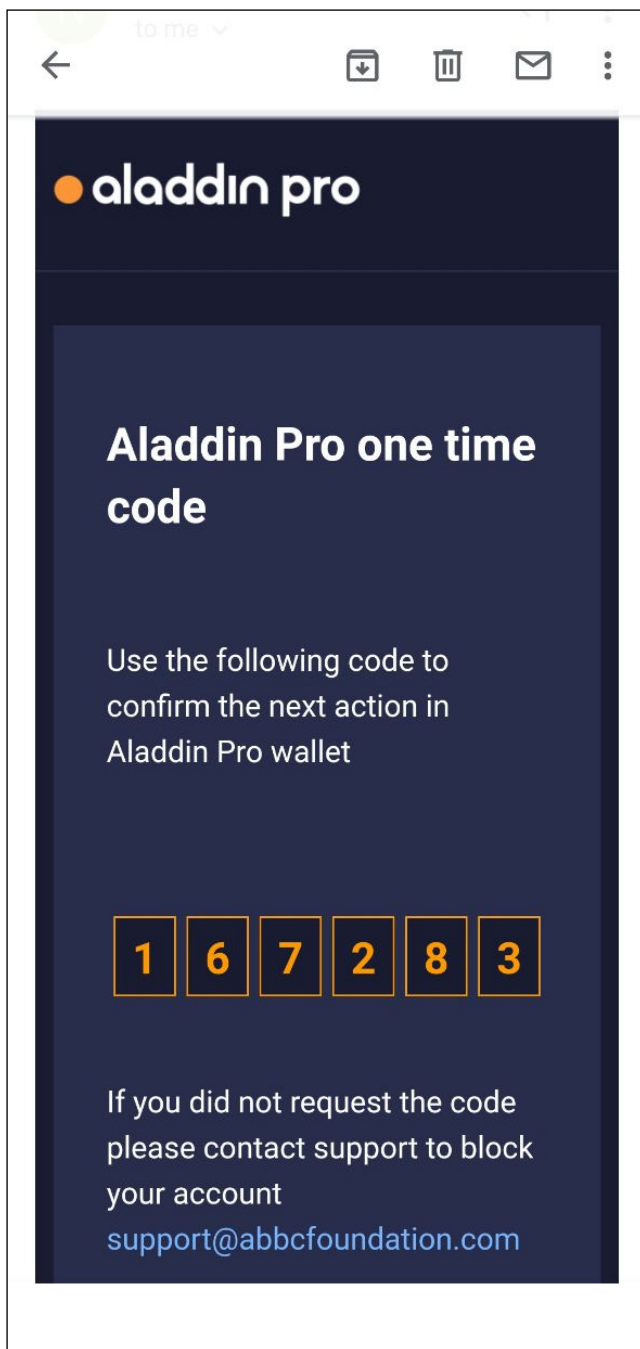

1. Click "Security settings".

2. Select "Email OTP".

- 3.** Enter your current passcode. A verification code will be sent to your registered email.

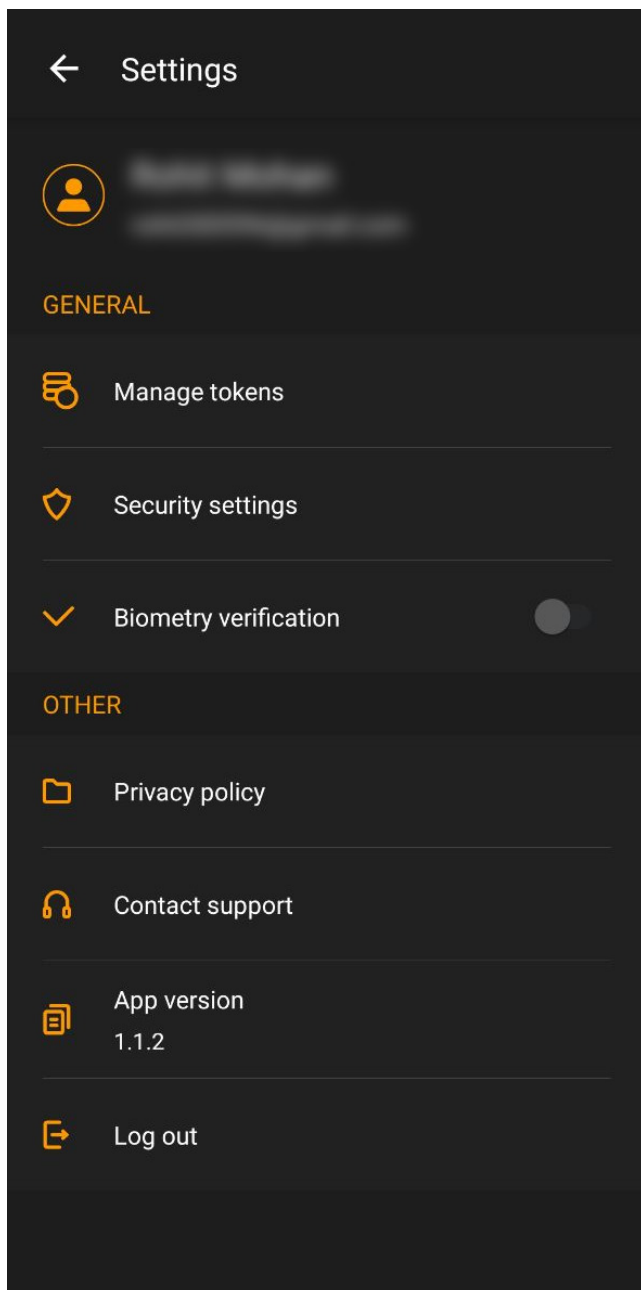

4. Check your inbox for the system message.
5. Enter the Email OTP on the Aladdin Pro app to confirm.

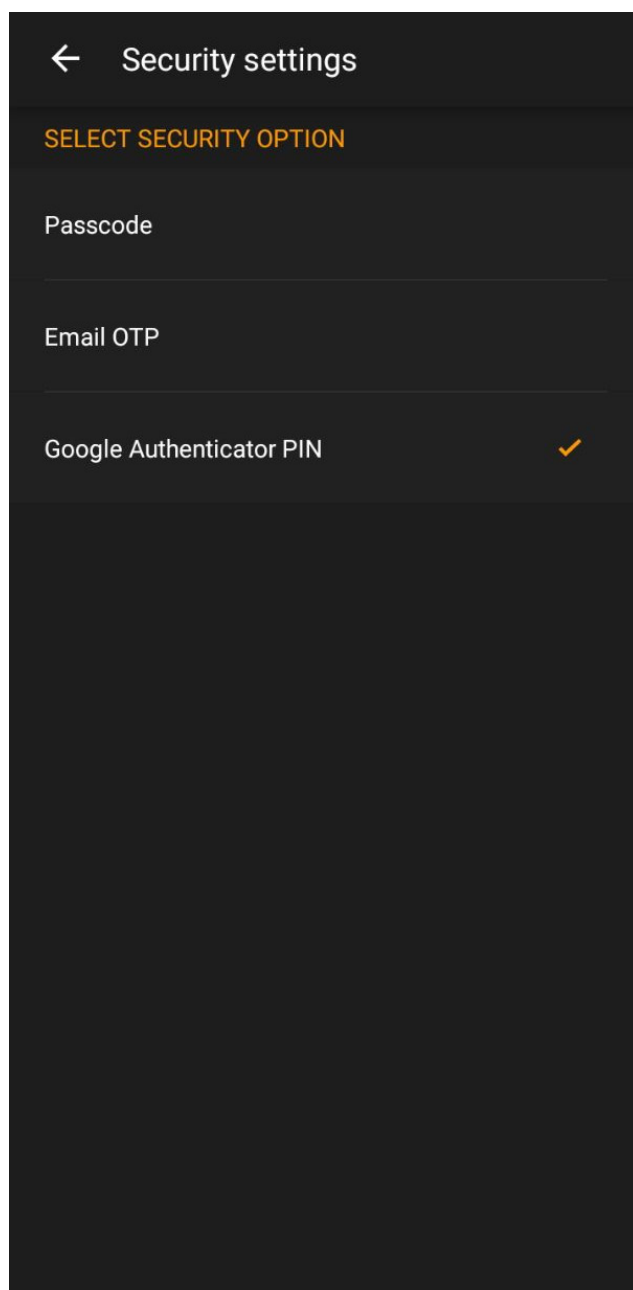

Congratulations! We will now be requesting for your Email OTP upon conducting transactions.

How to Set up Google Two-Factor Authentication (2FA)

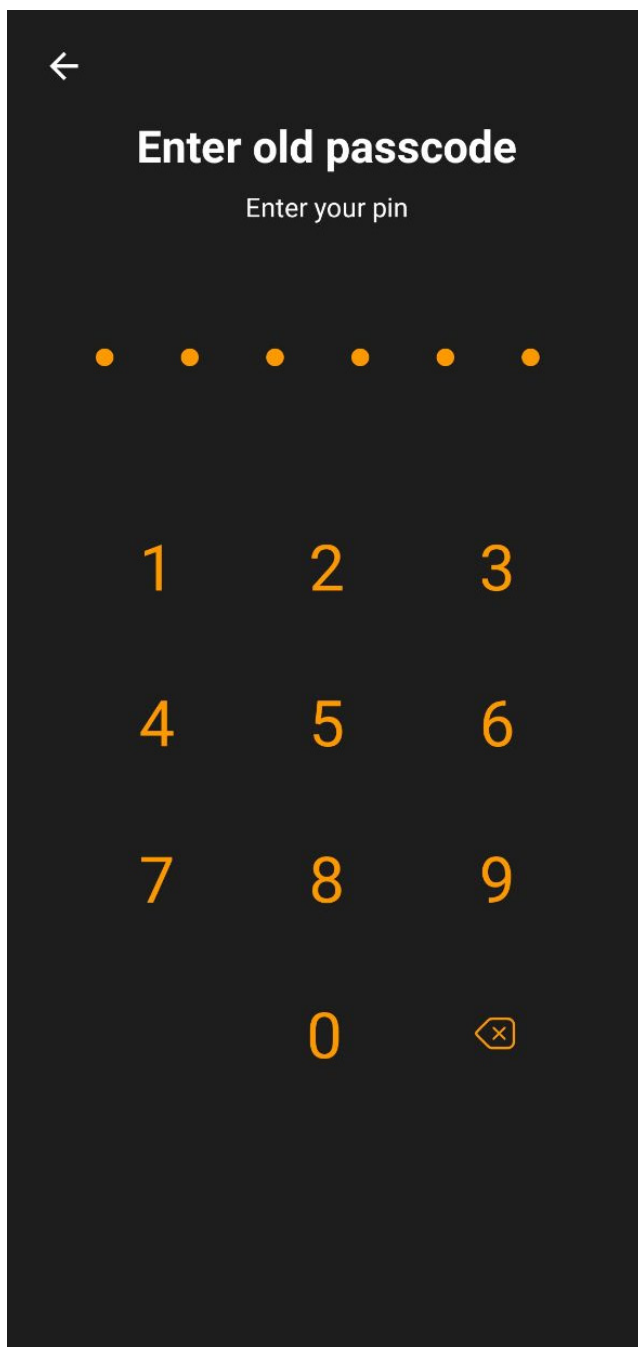

To avoid any delay, make sure to download the Google Authenticator app before selecting this option.

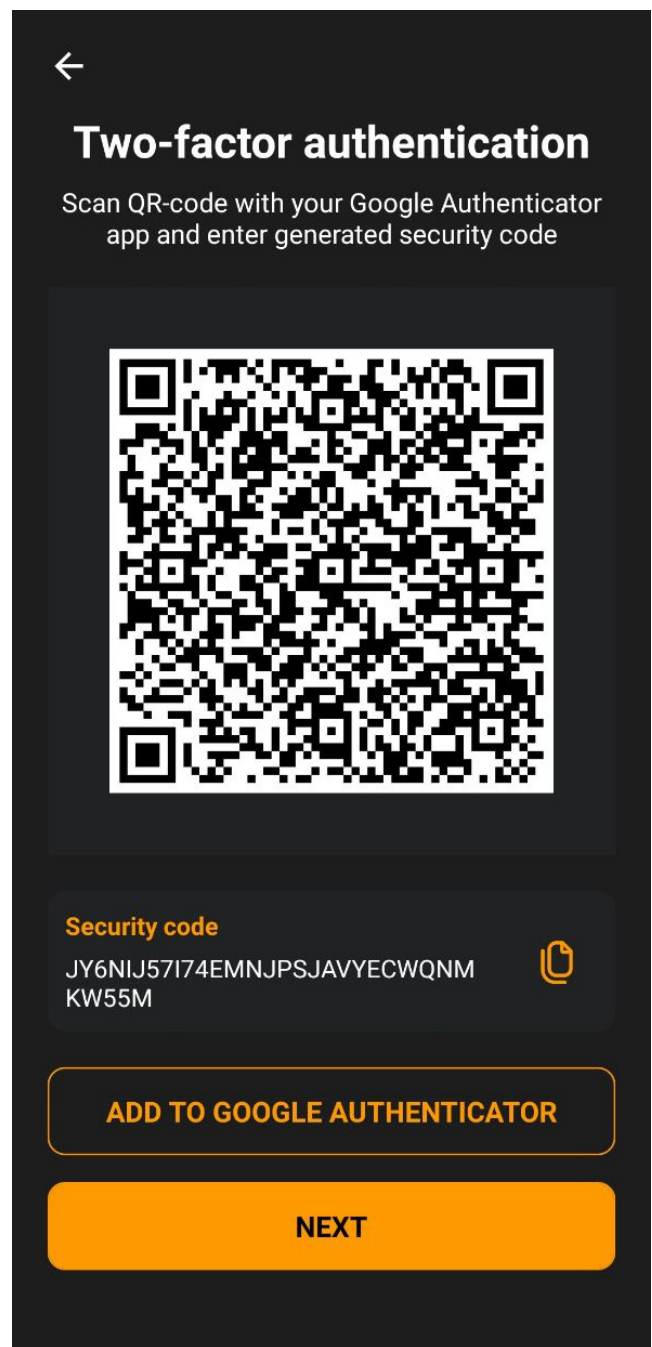

1. Click "Security settings".

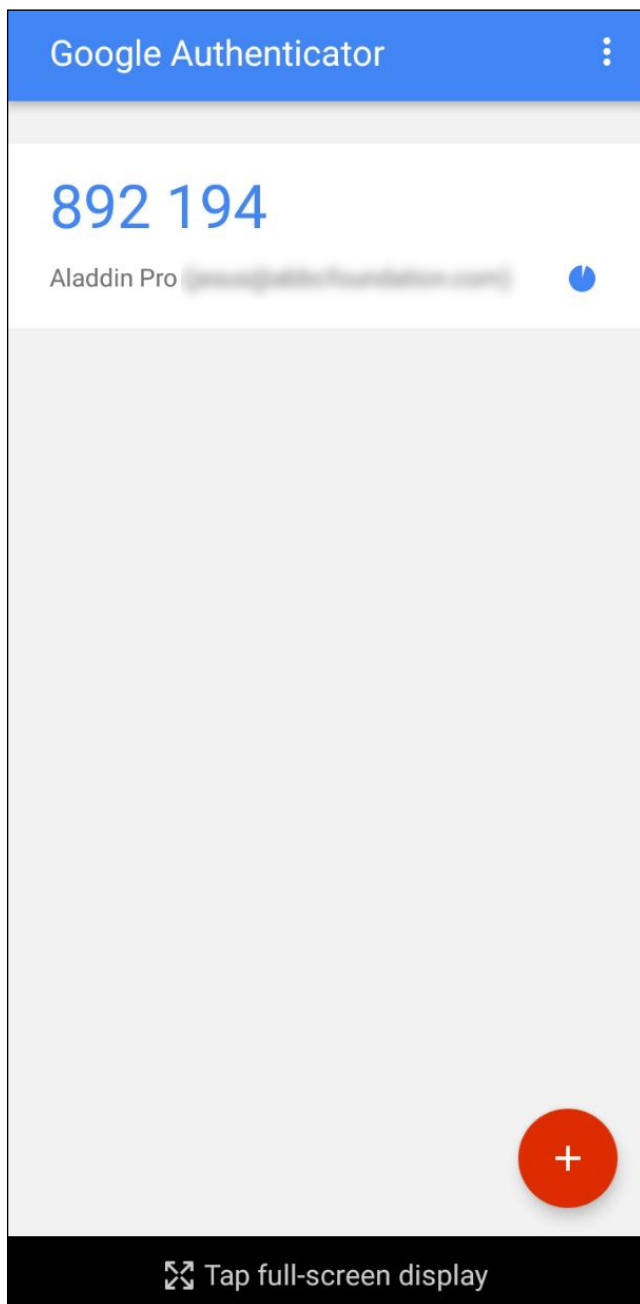

2. Select "Google Authenticator Pin".

3. Enter your current passcode to proceed.

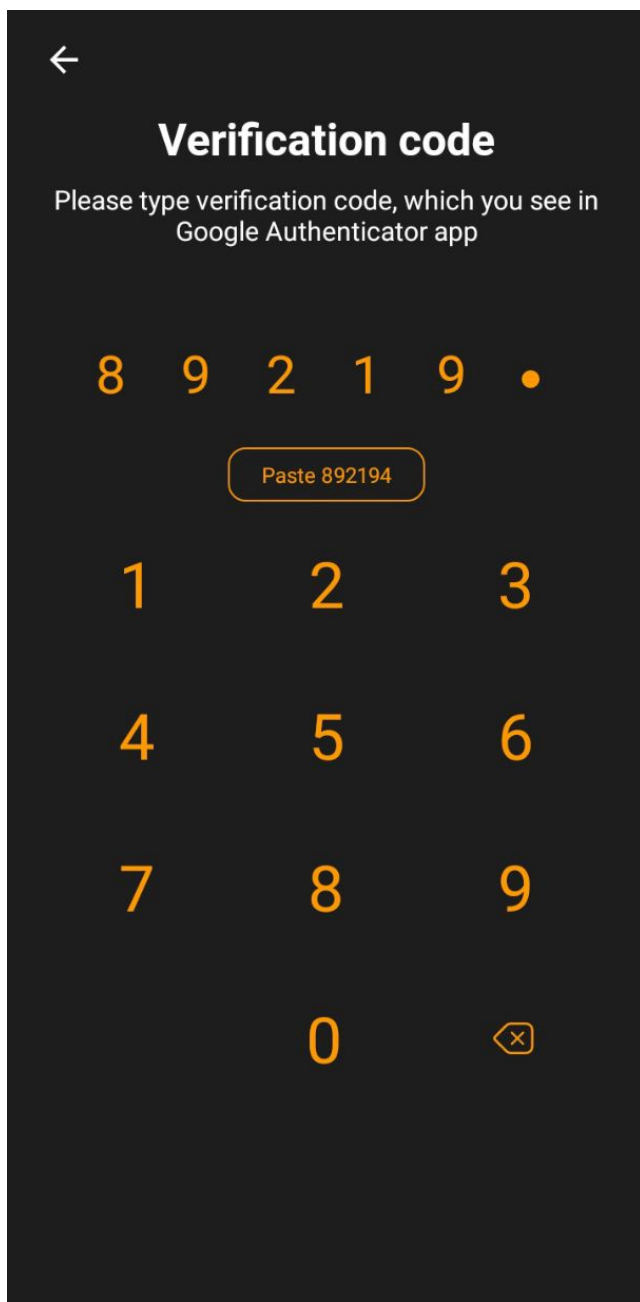

4. To enable two-factor authentication, select "Add to Google Authenticator". This option will redirect you to the Google Authenticator app installed on your device.

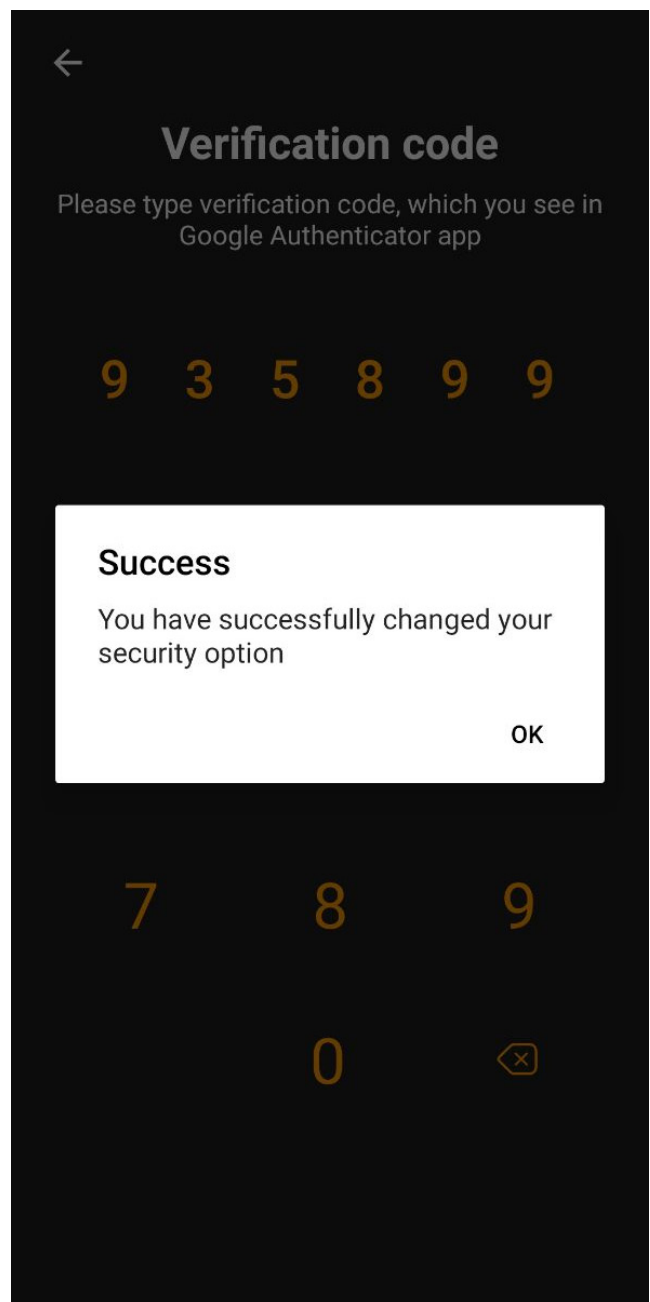

5. Copy or take note of the Google OTP code.

6. Go back to the Aladdin Pro app and click "Next" to continue.

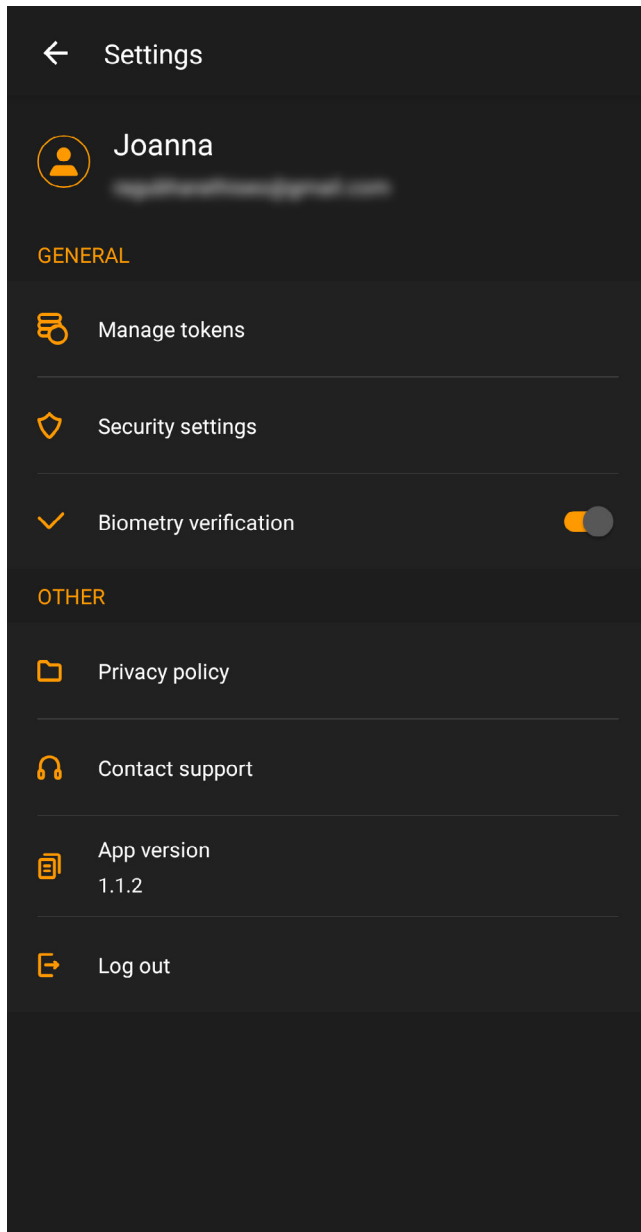

7. Input the Google OTP code to confirm.

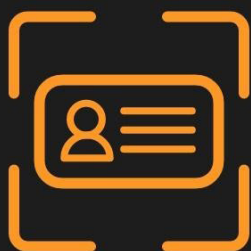

Hurray! You can now use Google 2FA when confirming every outgoing transaction.

How to Enable Biometric

1. Go to the Settings menu and click the biometry verification to enable it.
2. Choose one biometric feature that is available on your device:
 - Fingerprint
 - Iris Scan
 - Face Recognition

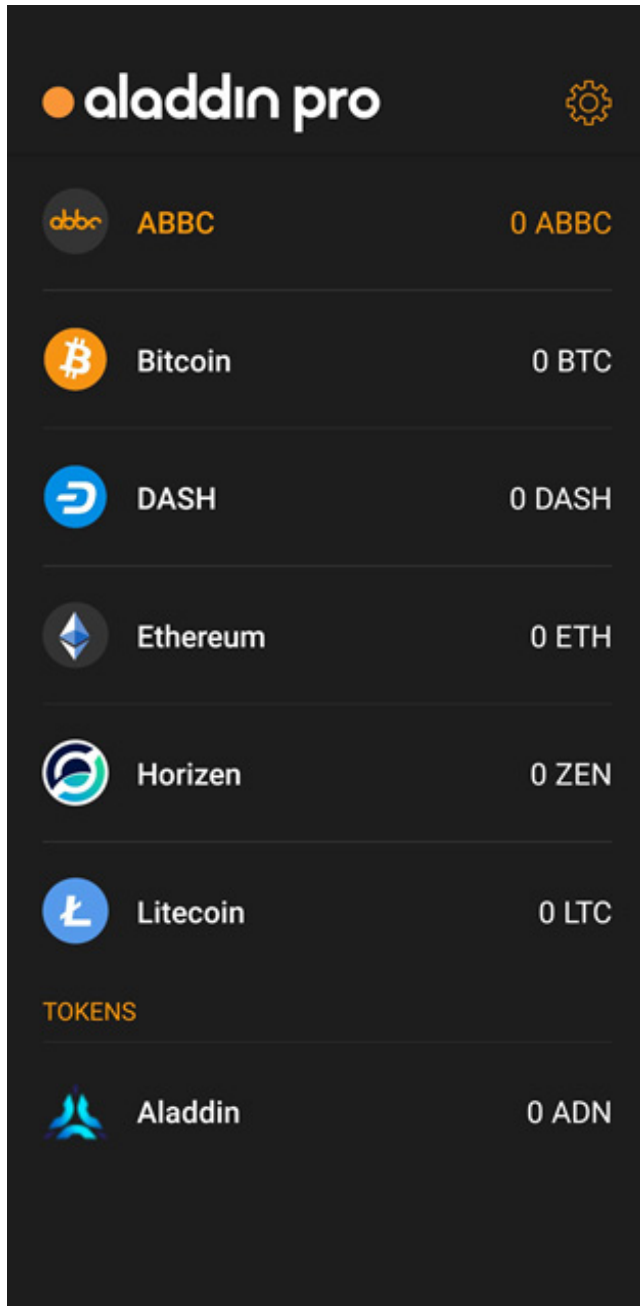

Biometric verification

You have to verify your identity via fingerprint
or system passcode

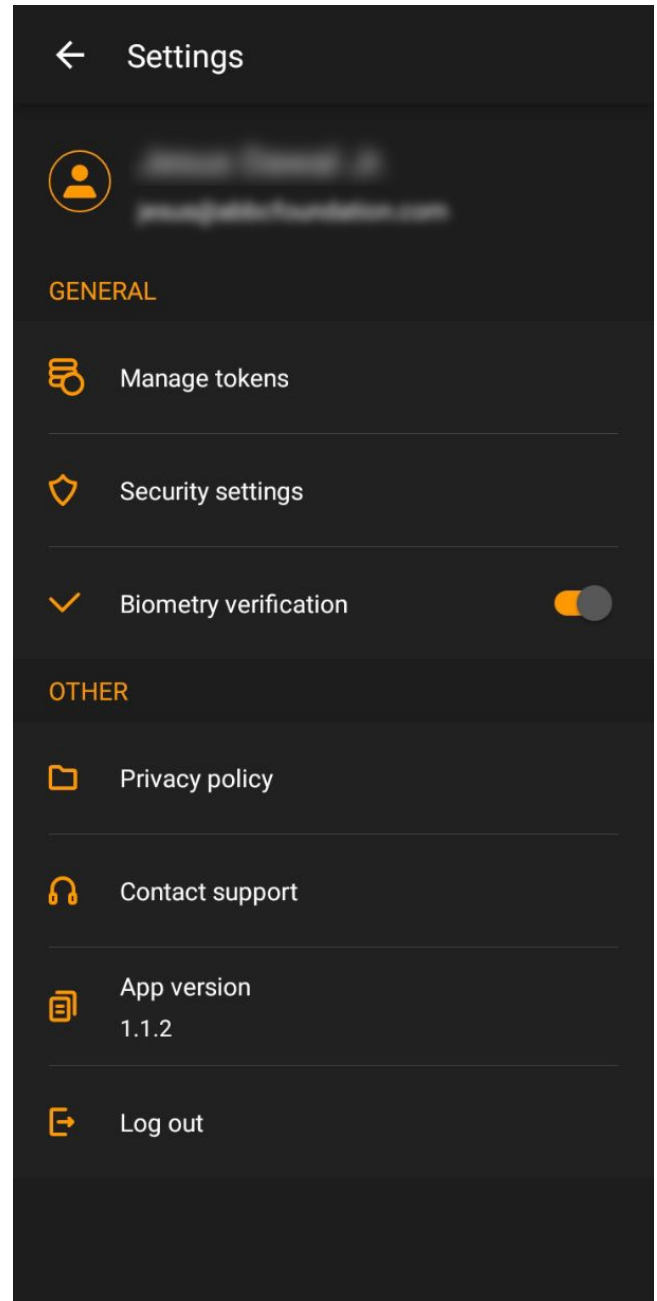

VERIFY

Once the biometric verification has been enabled, every login attempt will prompt the users to verify their identity via biometrics or passcode.

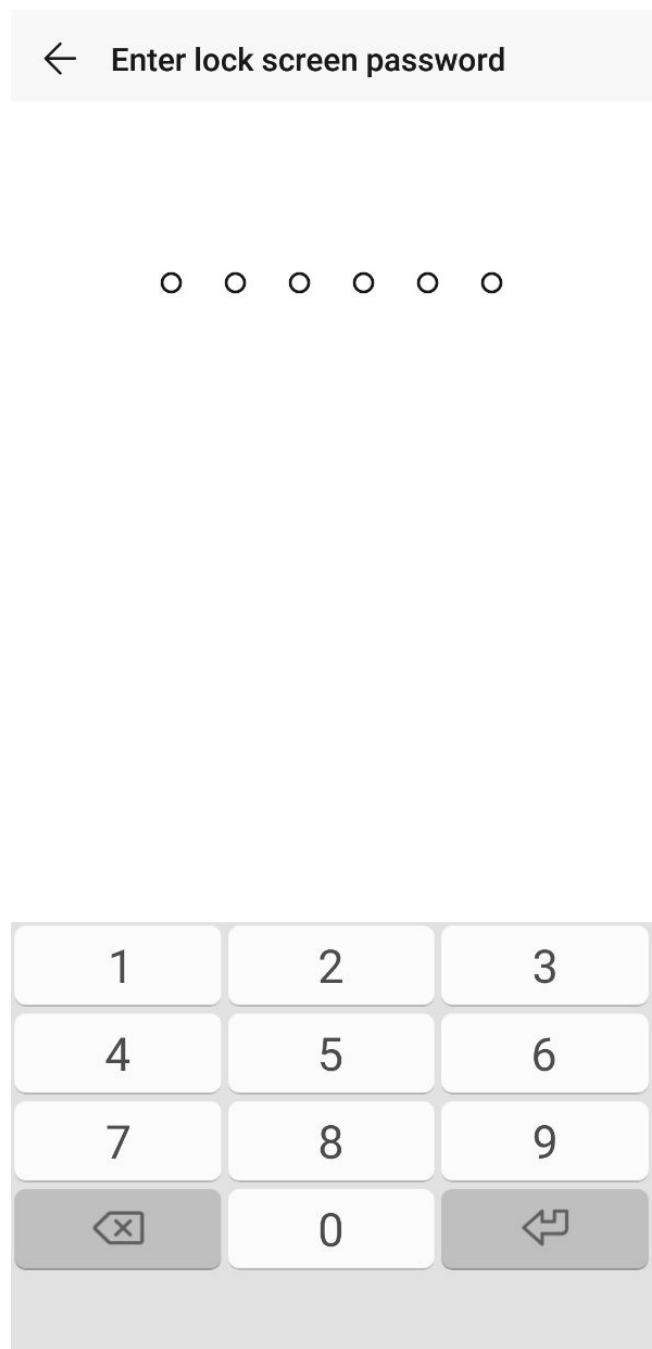

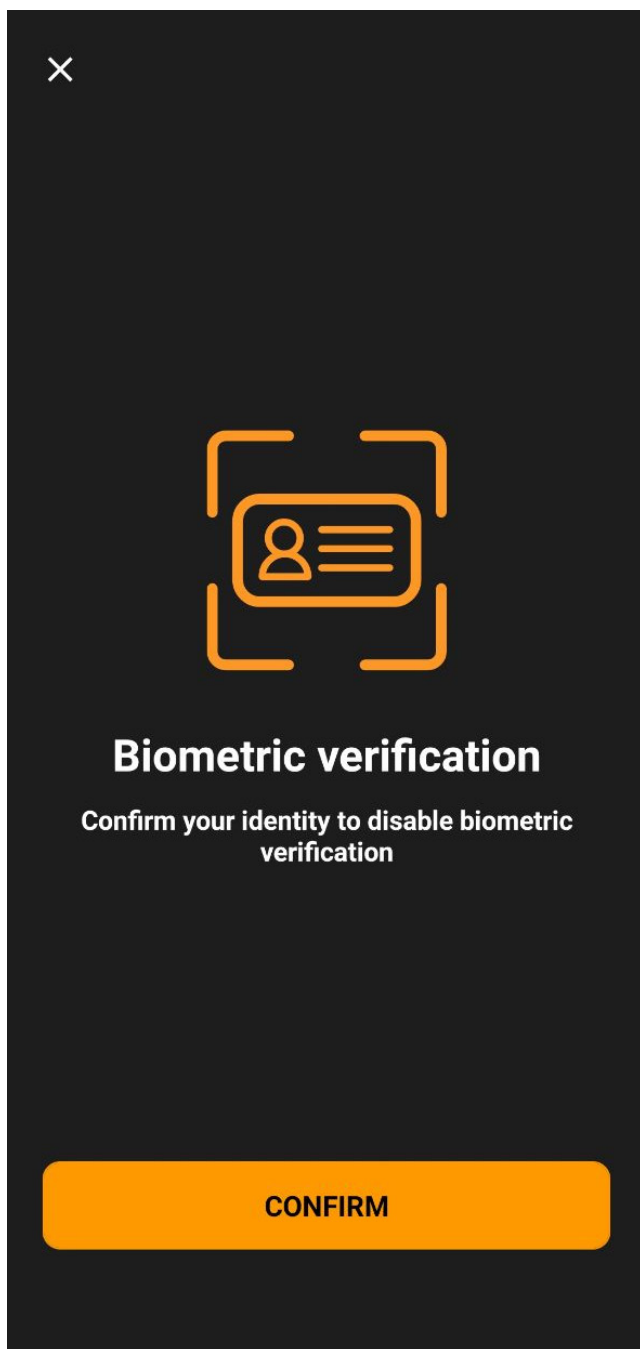

How to Disable Biometric Verification

1. Click the Settings icon on the upper right corner.

2. Select "Biometry verification".

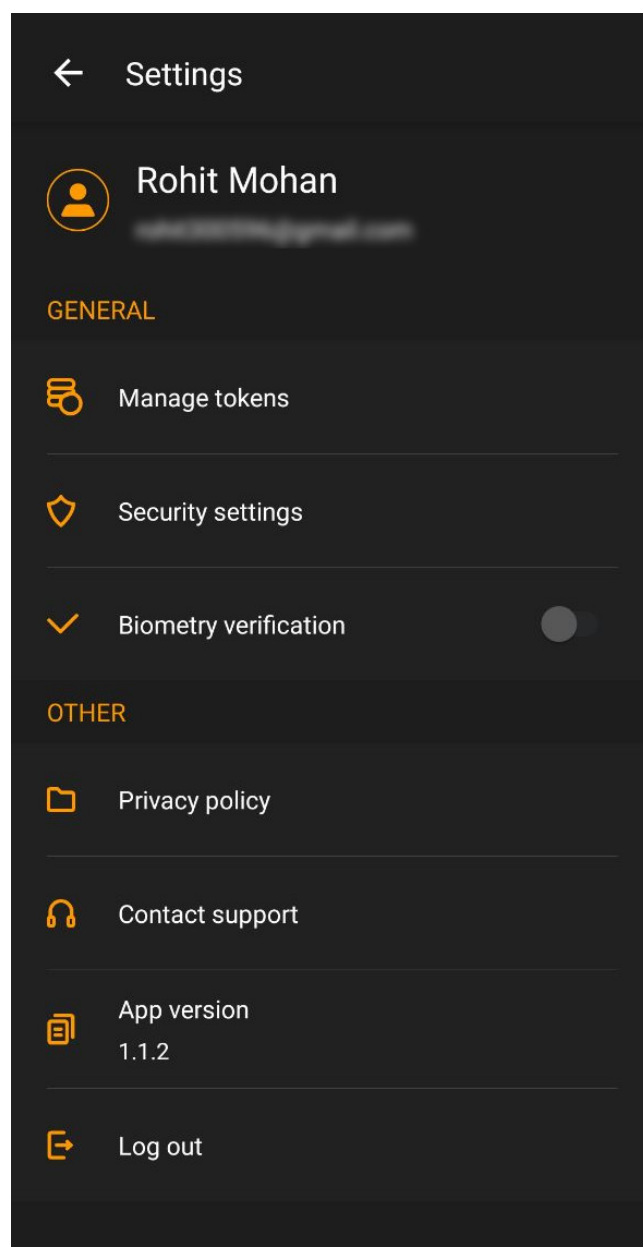

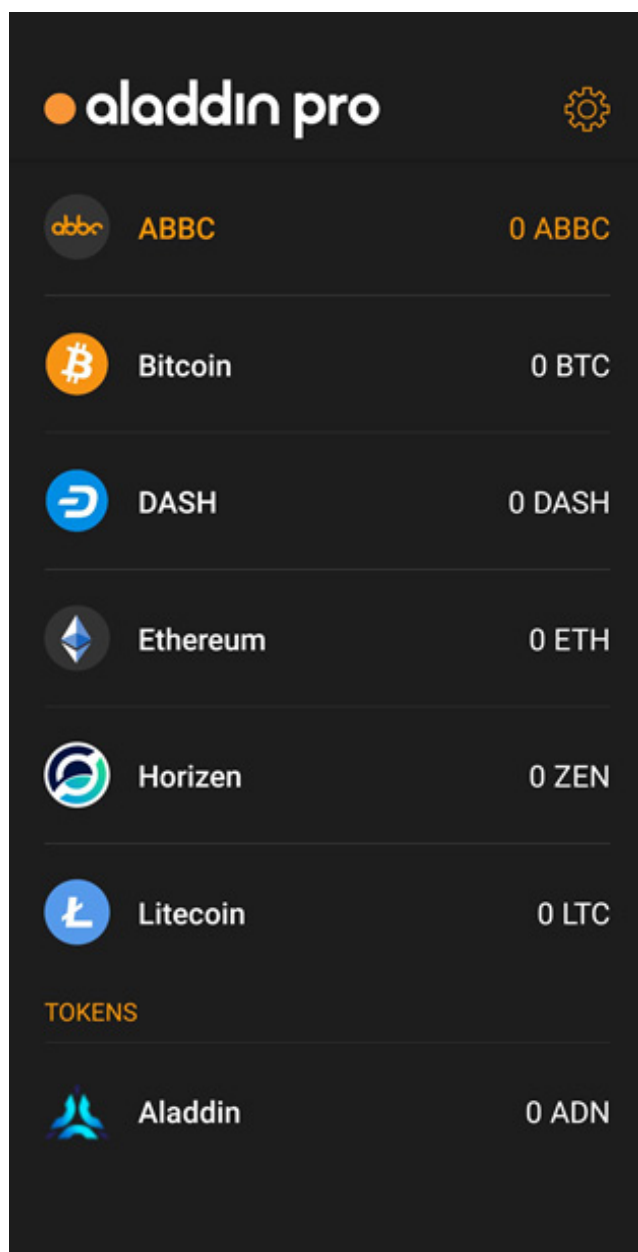

3. Upon clicking, a screen will prompt to disable the biometric verification. Tap 'Confirm' if you wish to proceed.

4. Enter your lock screen password to successfully disable this feature.

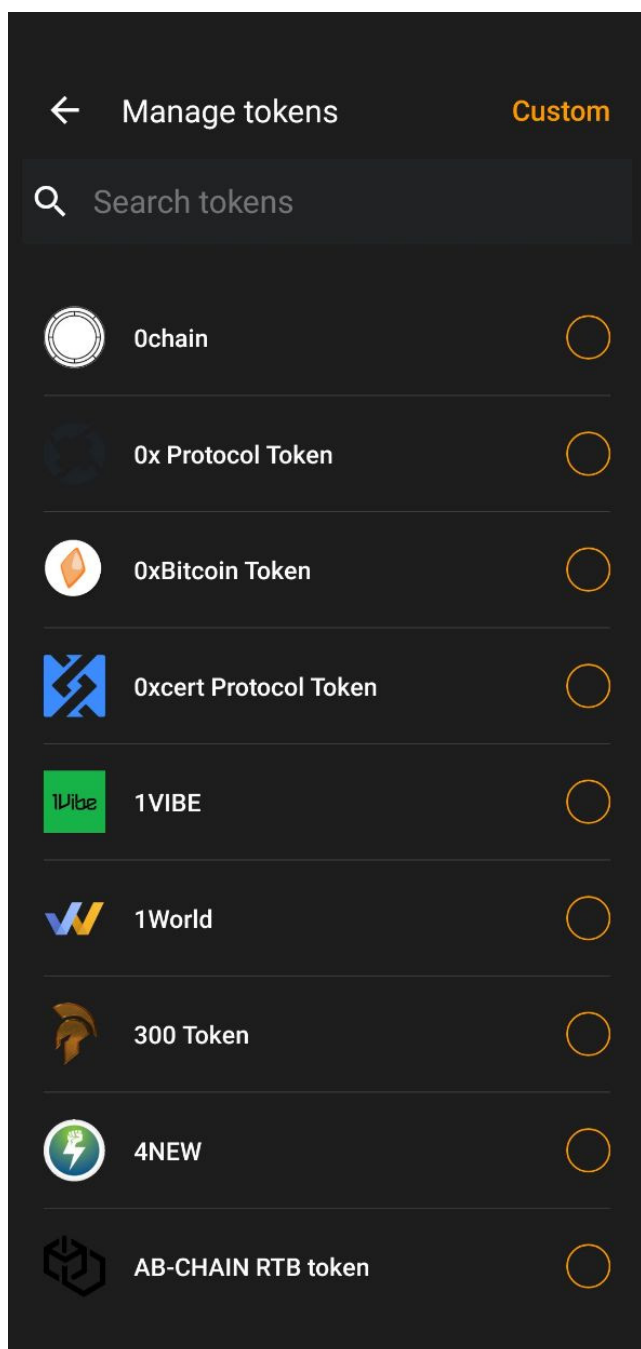

Note: We suggest that users must not disable their biometric verification as it serves as an additional security layer.

How to Manage Tokens

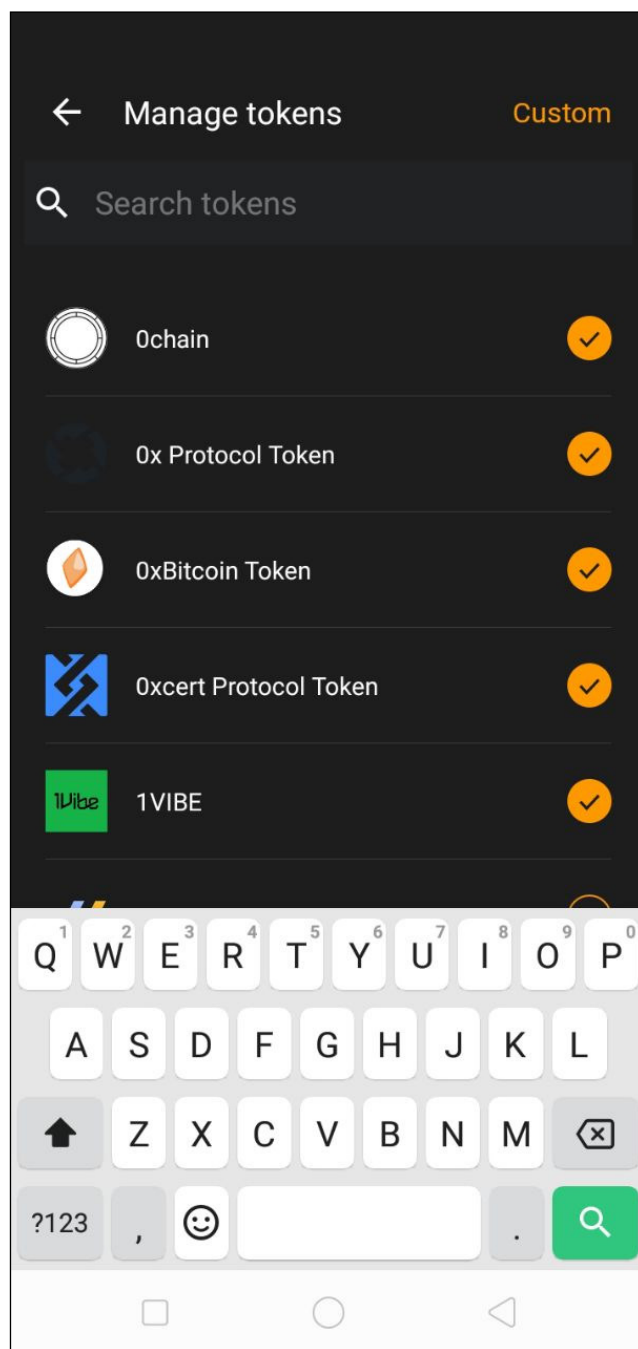

Aside from major cryptocurrencies, Aladdin Pro supports all ERC-20 tokens. For convenience, users can customize their wallet dashboard to display the tokens they currently hold or wish to hold in the future.

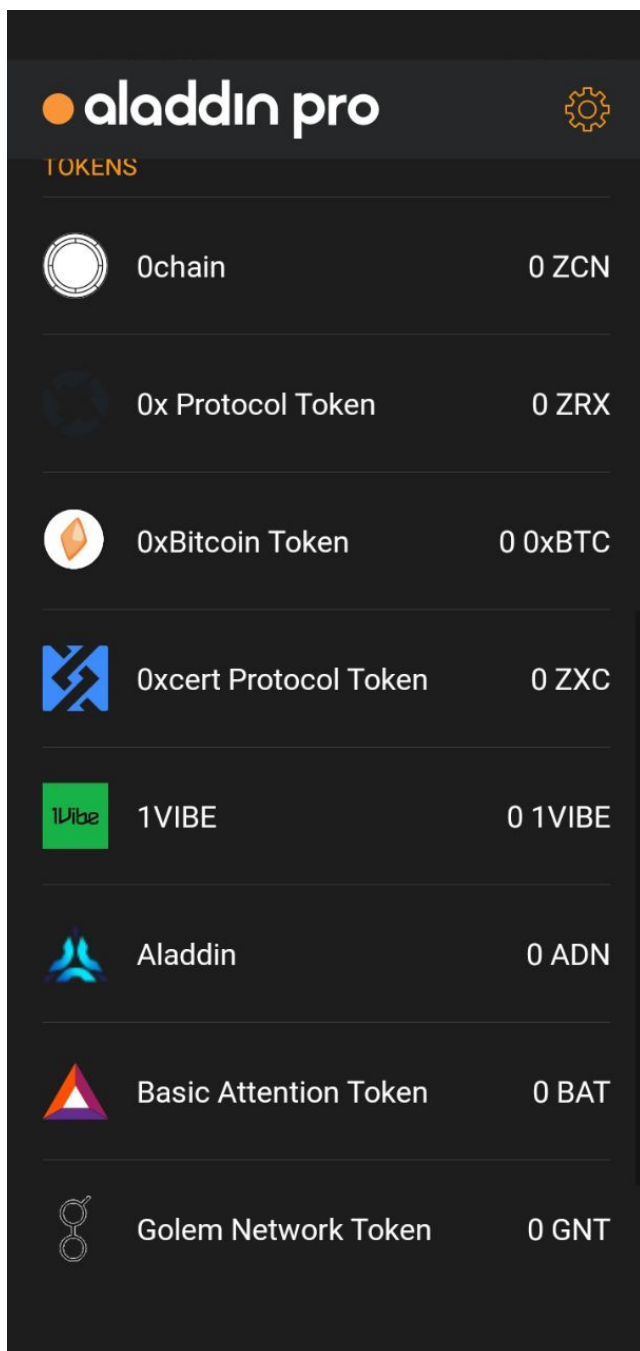

1. Click the Settings icon at the top right corner.
2. Select "Manage tokens" under the General tab.

3. Type the token name in the search bar.

4. Click your preferred token to successfully add it under the token list on your wallet dashboard. You can select multiple tokens to be added.

5. Go back to your wallet dashboard to see the updated token list.

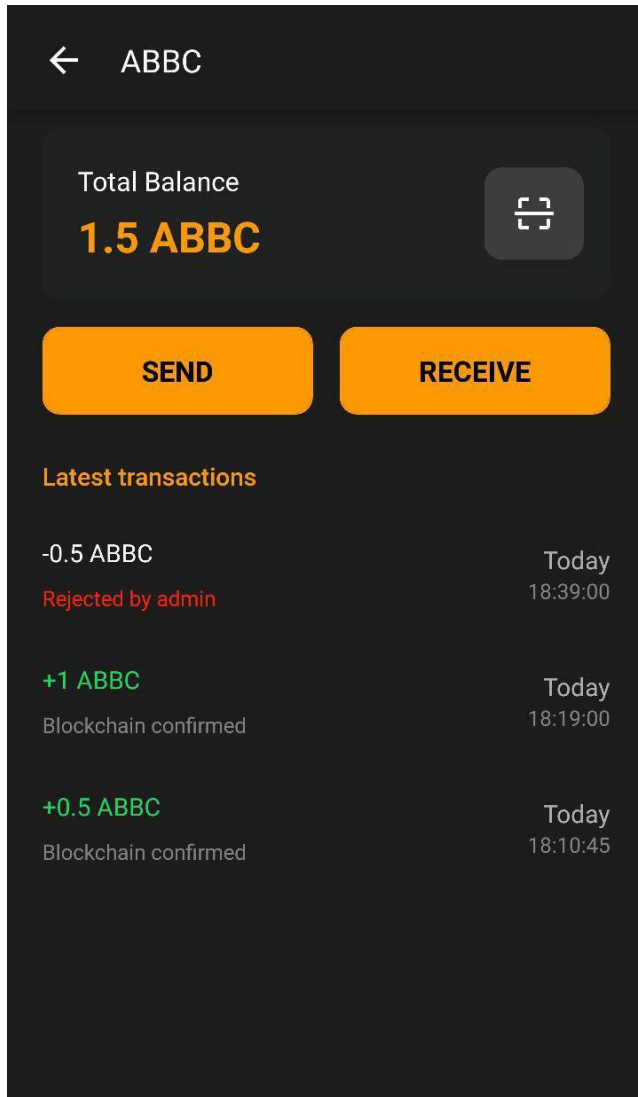

How to Send and Receive Funds

The 'Send' screen features a dark background with orange accents. At the top, there is a close button (X) and the title 'Send' with a balance of '0 ABBC'. A QR code icon is in the top right. The main area contains three input fields: 'To' (labeled 'Enter address'), 'Amount' (labeled 'Enter amount'), and 'Memo (optional)'. Below these is a 'Fee' section showing '0.01 ABBC'. At the bottom is a large orange 'SEND' button.

1. For sending funds, users just have to enter the wallet address of the receiver and the amount of funds to be sent.
2. You can leave a personal message on the 'Memo' space to the person who will receive the funds.
3. For receiving funds, you have two options:
 - Share your wallet address to the sender
 - Let the sender scan your wallet's QR code

Transaction Status

In the Aladdin Pro Wallet, transactions will have three status:

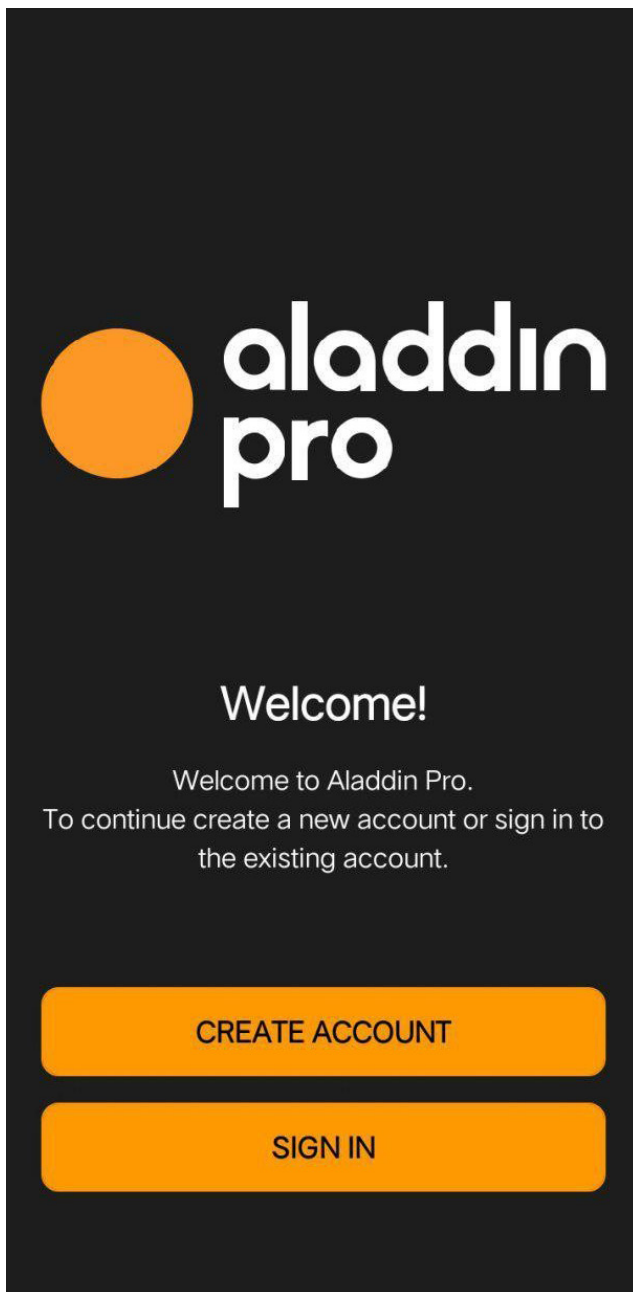

1. **Approved by User** – This status indicates that the user has already proceeded on sending the transaction and now waiting for the Aladdin Pro Wallet admin approval.
2. **Blockchain Confirmed** – This status means that the transaction has been approved by the administrator and has been confirmed on the blockchain.
3. **Rejected by Admin** – Transaction under this status is rejected by the administrator for a valid reason. For any clarifications, please contact support.

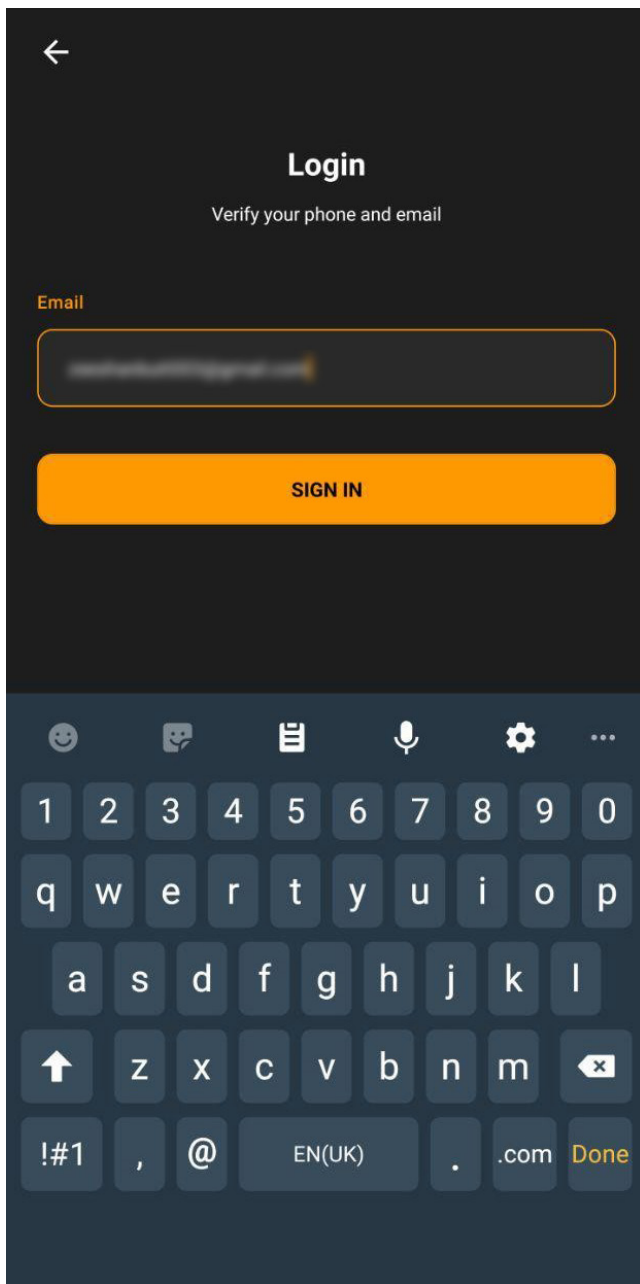

How to Access Account on New Device

In case you want to access your Aladdin Pro Wallet account on a new device, please keep in mind the following procedures:

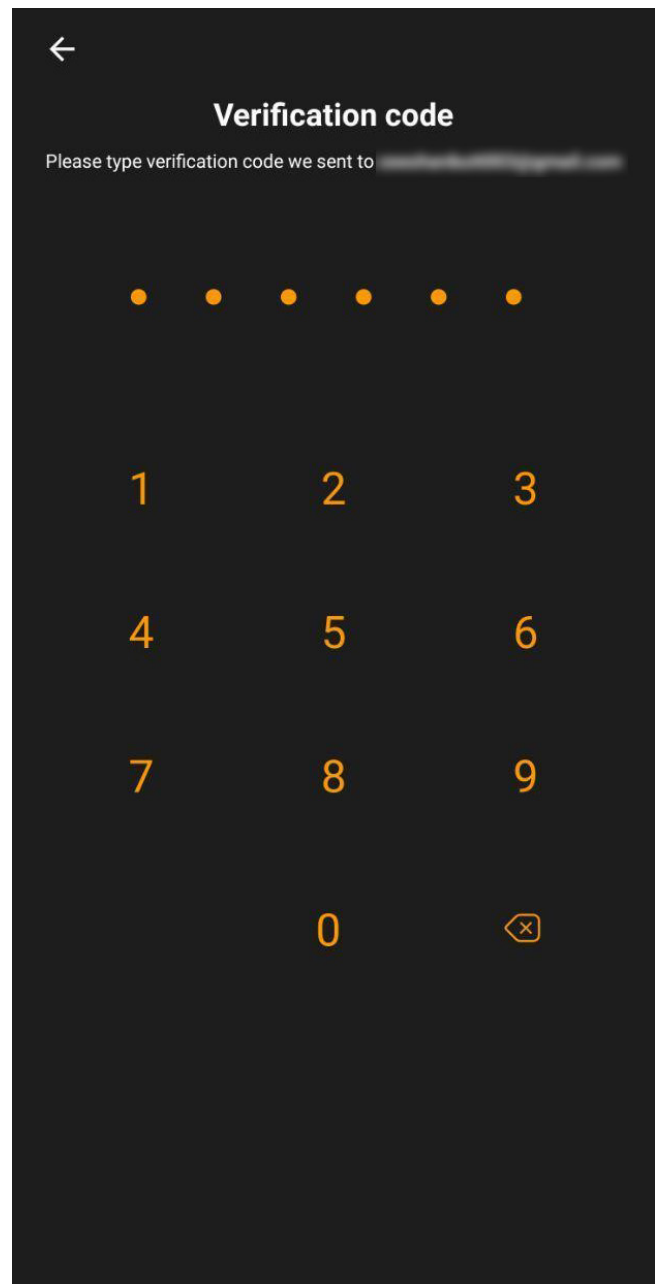

1. For existing users, click 'Sign In'.

*** If you are a new user, click 'Create Account' and go back to the "How to Create an Account" section.

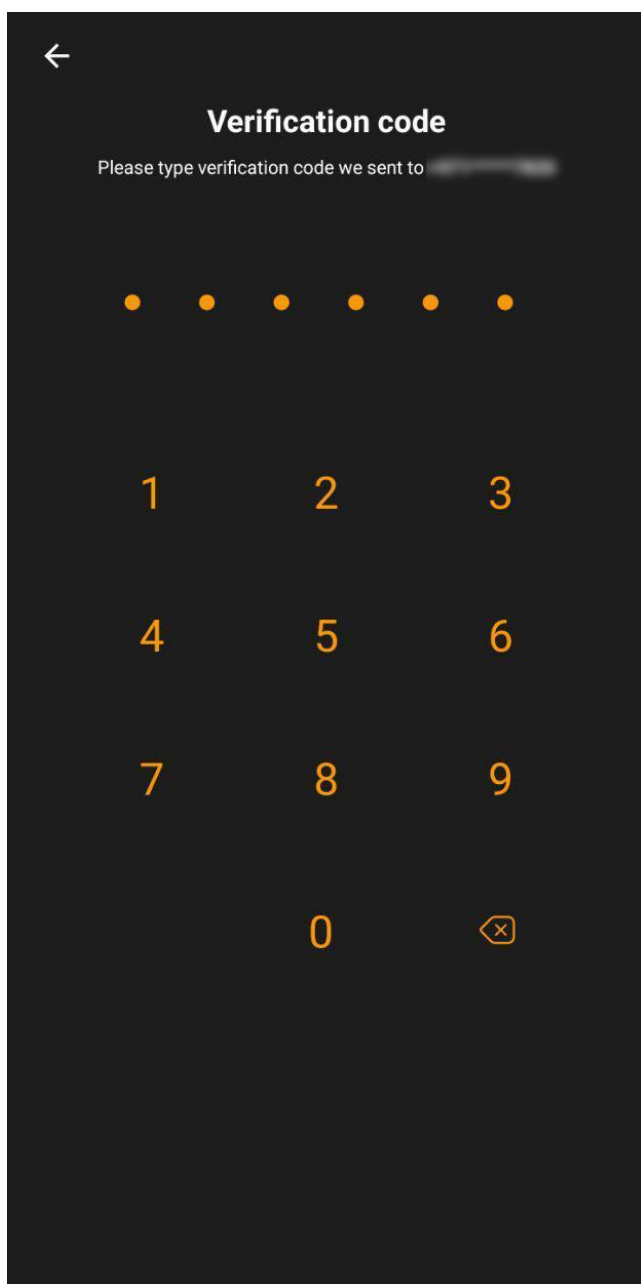

2. Enter your registered email address.

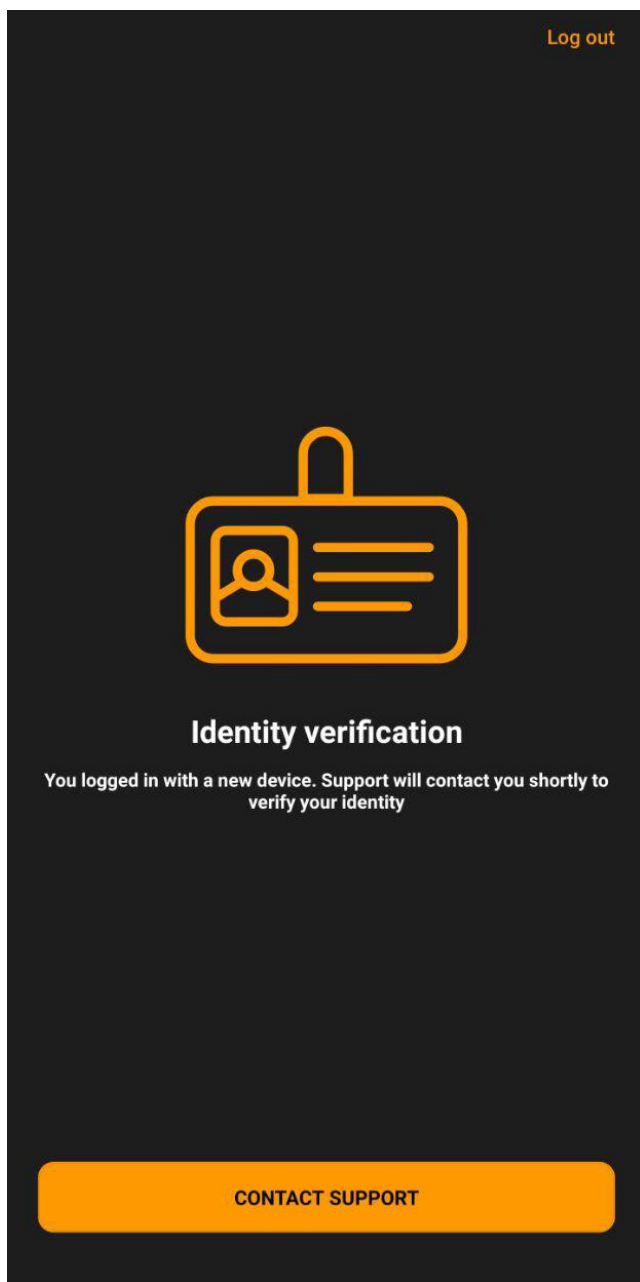

3. Input the verification code sent on your email to complete the email verification process.

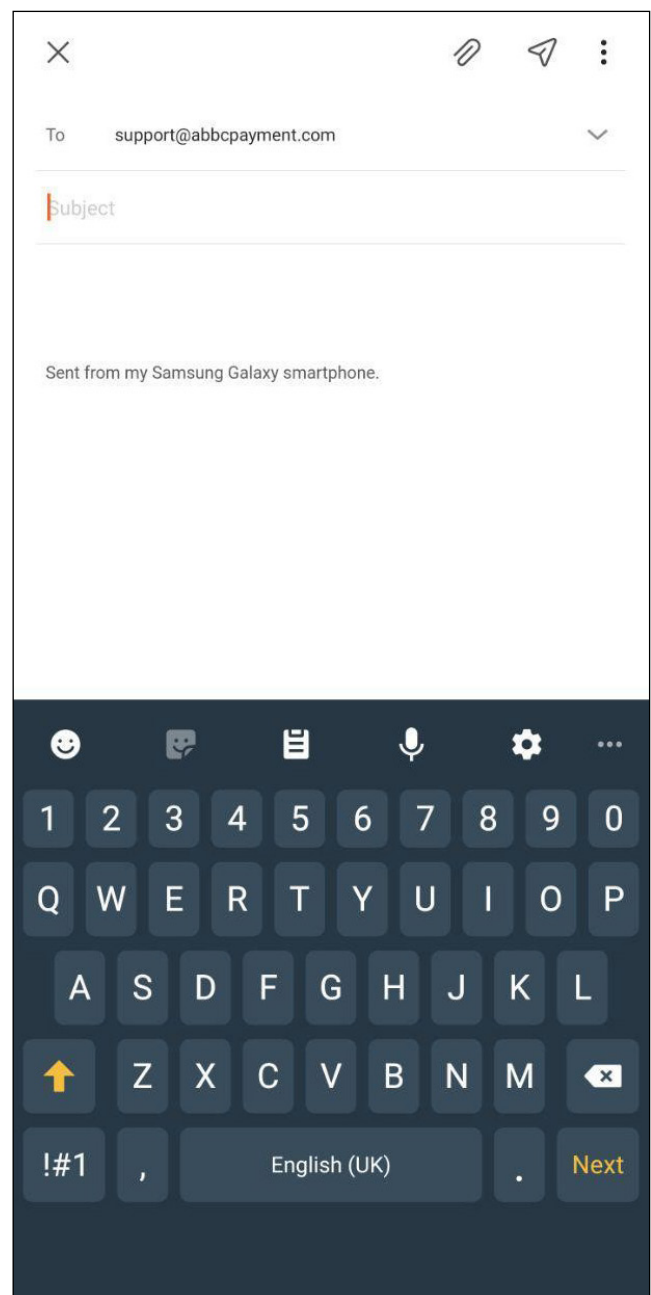

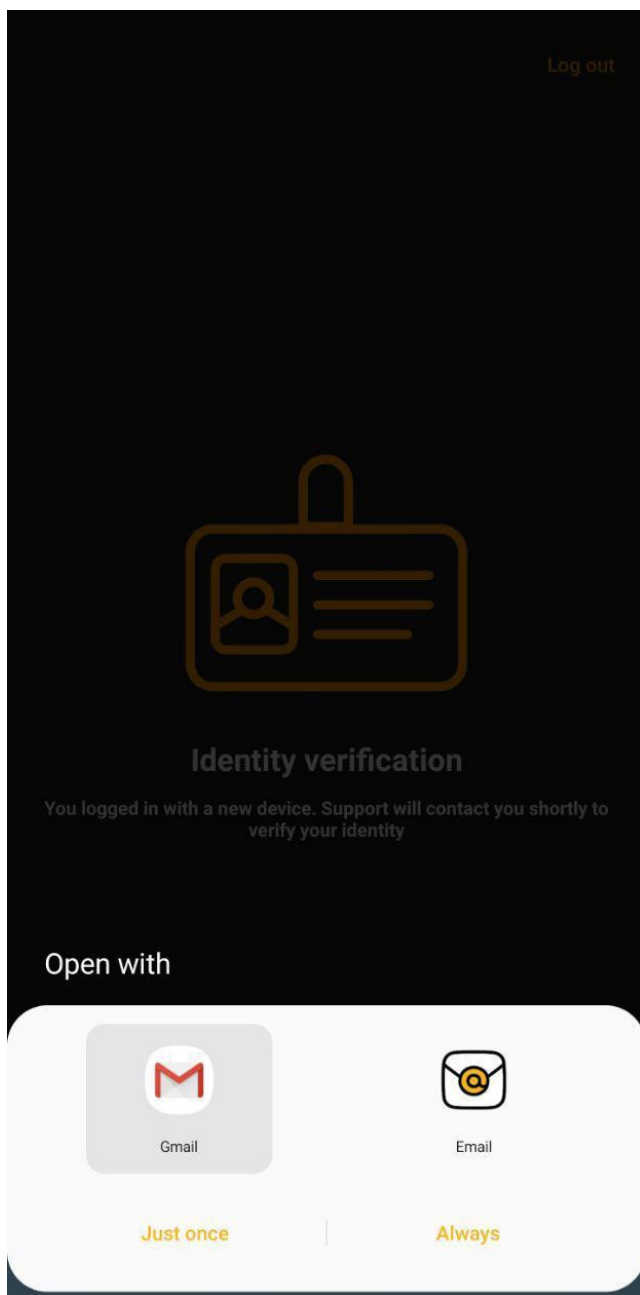

A dark-themed mobile application screen for entering a verification code. At the top left is a white back arrow. The title "Verification code" is centered in white. Below it, a subtitle reads "Please type verification code we sent to" followed by a blurred grey rectangle. In the center, there are six orange dots arranged horizontally, representing the input fields for the code. Below the dots is a numeric keypad with orange numbers 1 through 9, 0, and a backspace icon (a square with a left arrow and an 'x').

4. Input the verification code sent on your registered mobile number to complete the verification process.

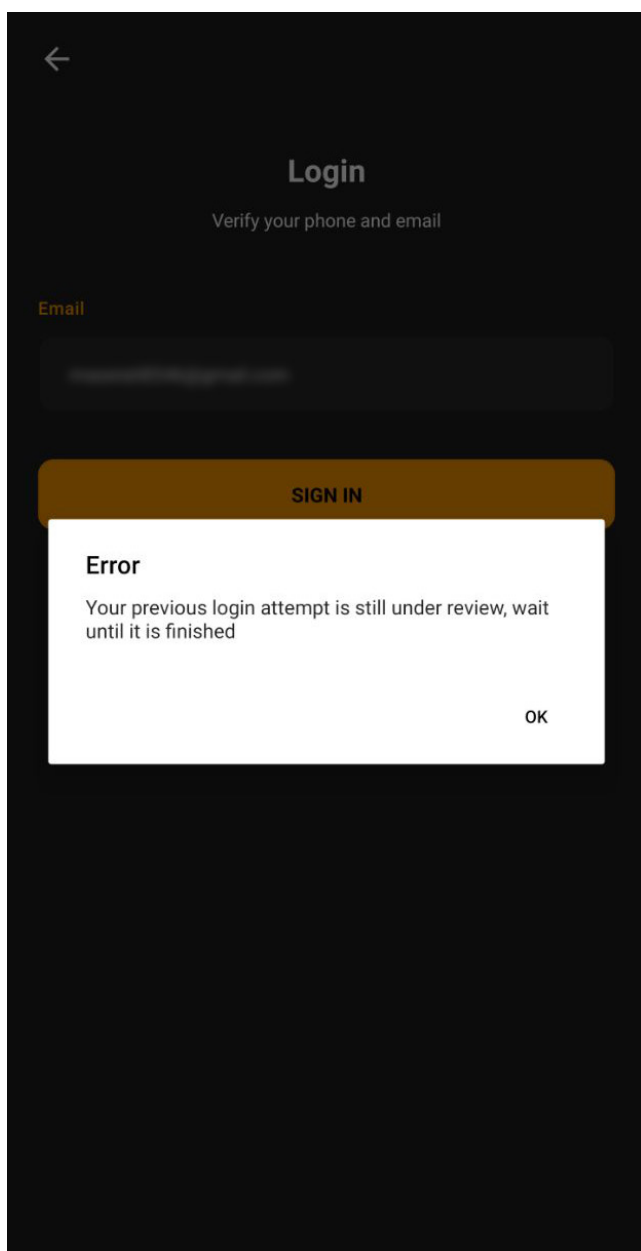

5. The identity verification process must be completed by contacting the Aladdin Pro Wallet support team.
6. Click 'Contact Support' to proceed.

- 7.** Choose your preferred email provider (Gmail, Yahoo, Hotmail, etc.)
- 8.** Create an email message addressed to support@abbcpayment.com requesting login approval on a new device.

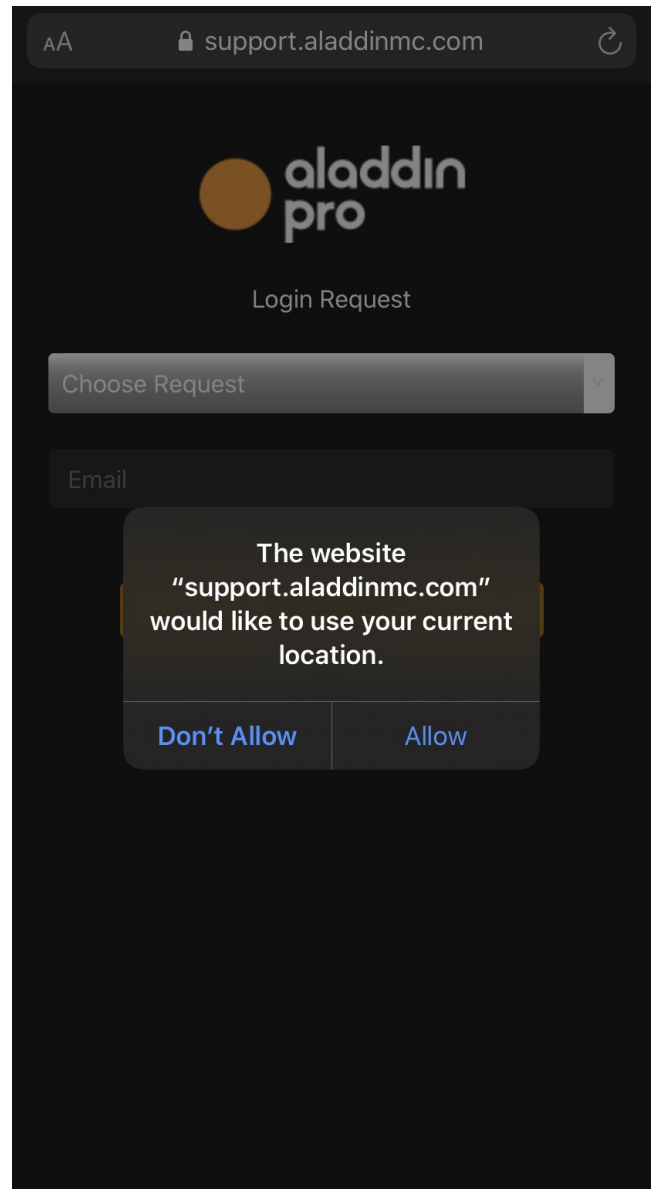

- 9.** The admin support will check the email and will call you shortly for identity verification.

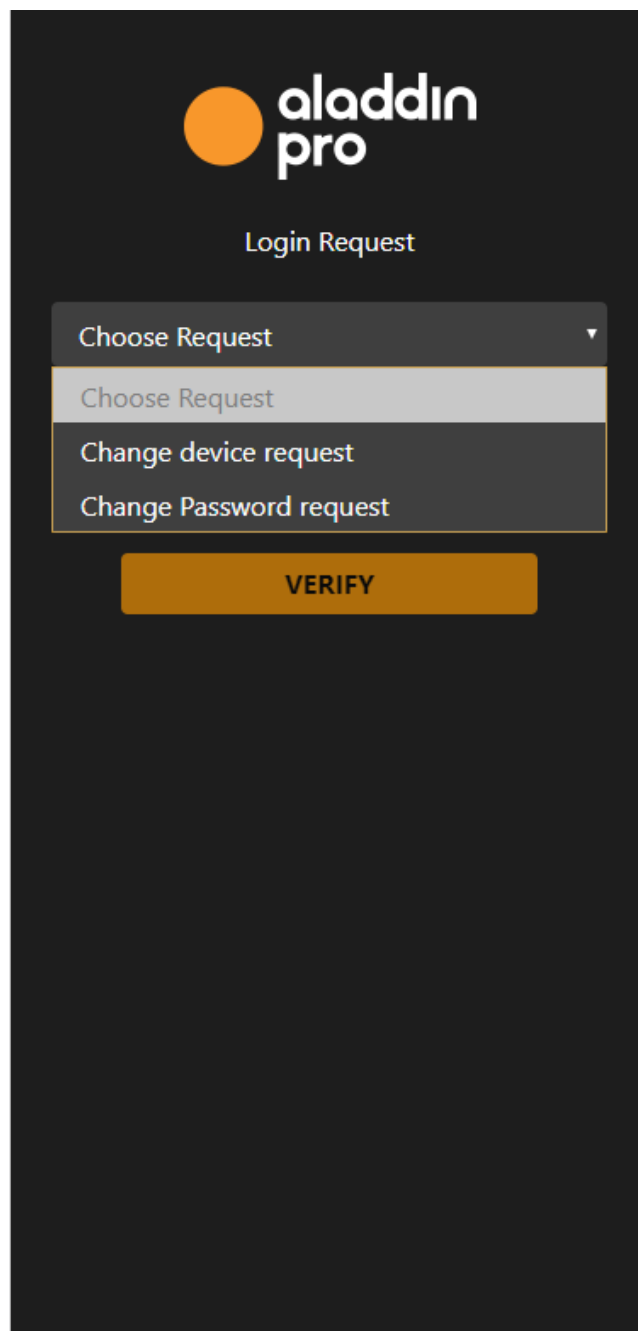

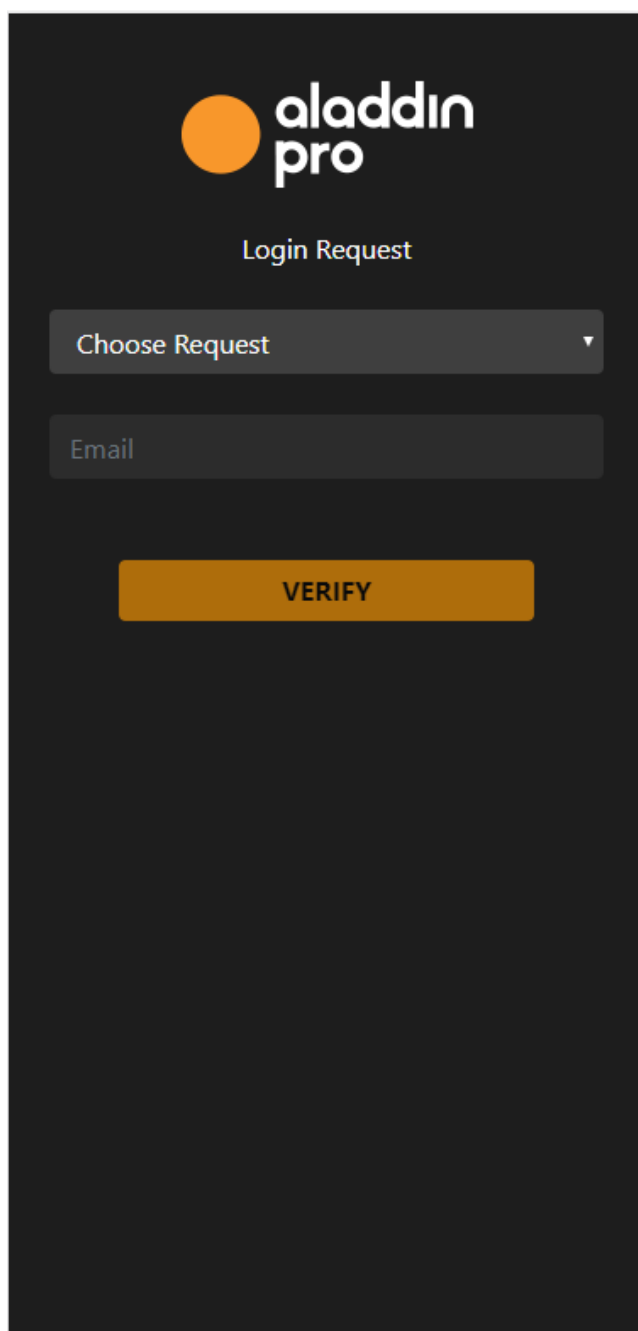

10. If the previous login attempt is still under review, the user cannot log in to their Aladdin Pro Wallet account using their registered mobile device or any other device.

How to Access Aladdin Pro Wallet Security Support

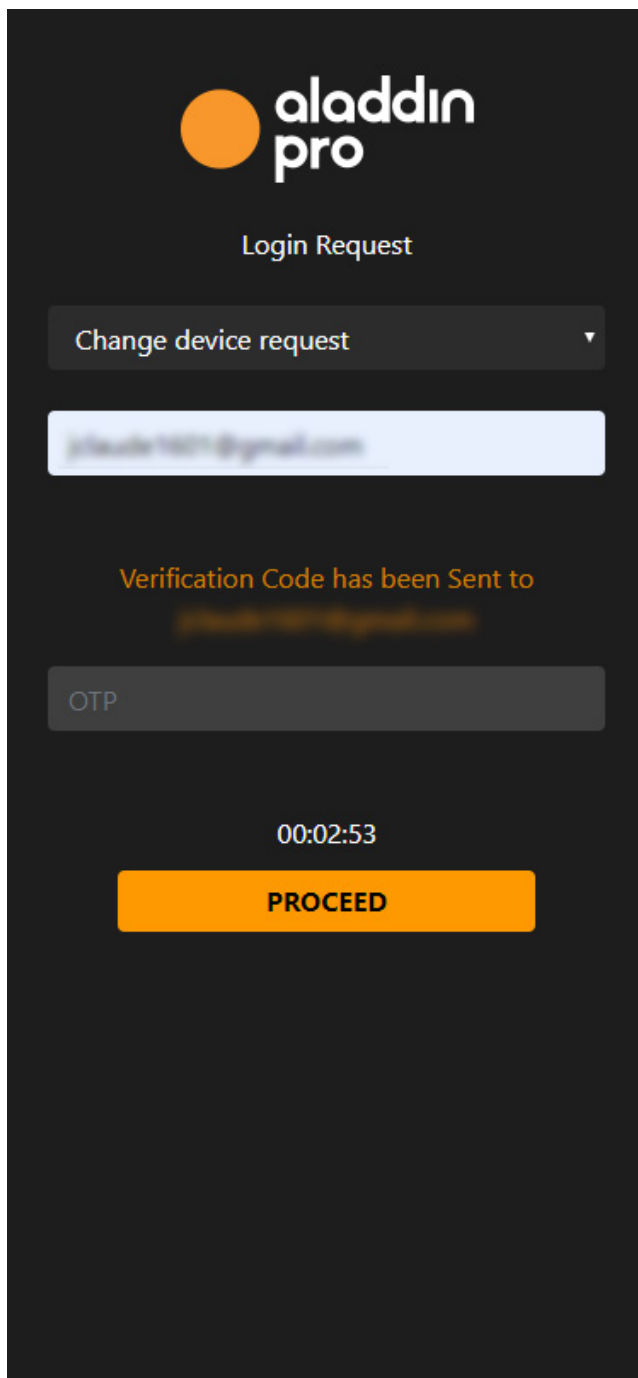

Note: This feature is available for the mobile view only.

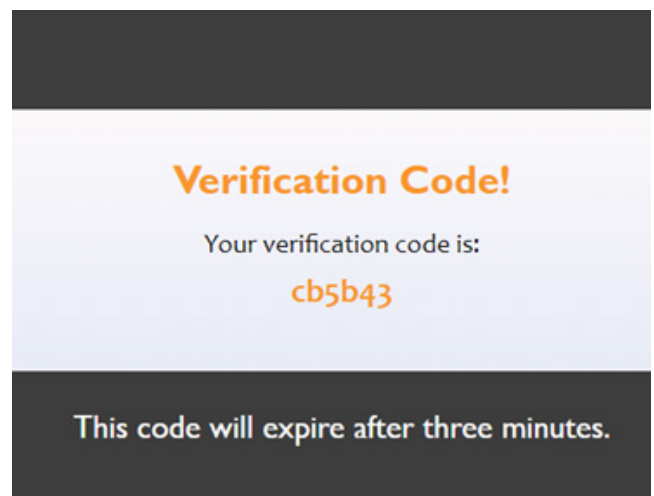

1. Existing users must go to the official website [www.aladdinmc.com] and click the Security Support icon.
2. You will be redirected to the <http://support.aladdinmc.com>.
3. Click 'Allow' to give access to your current location.

4. Choose your request by clicking the drop-down button. (Change Device or Change Password).

The image shows the Aladdin Pro mobile app interface. At the top is the Aladdin Pro logo. Below it is the text "Login Request". There is a dropdown menu labeled "Change device request". Below that is a text input field containing the email address "jhaude1401@gmail.com". Underneath the email field, it says "Verification Code has been Sent to" followed by the same email address. Below this is an "OTP" input field. At the bottom, there is a timer showing "00:02:53" and a large orange button labeled "PROCEED".

The image shows a verification screen. It has a dark header and footer. The main content area is light blue and contains the text "Verification Code!" in orange, followed by "Your verification code is:" and the code "cb5b43" in orange. At the bottom, the footer contains the text "This code will expire after three minutes." in white.

5. Input your registered Aladdin Pro email address.
6. Input the verification code sent on your email.
7. Click Proceed.

Voice Verification

We need your voice sample. Please tap Record button and say the following phrase

The big brown fox jumps over the lazy dog.

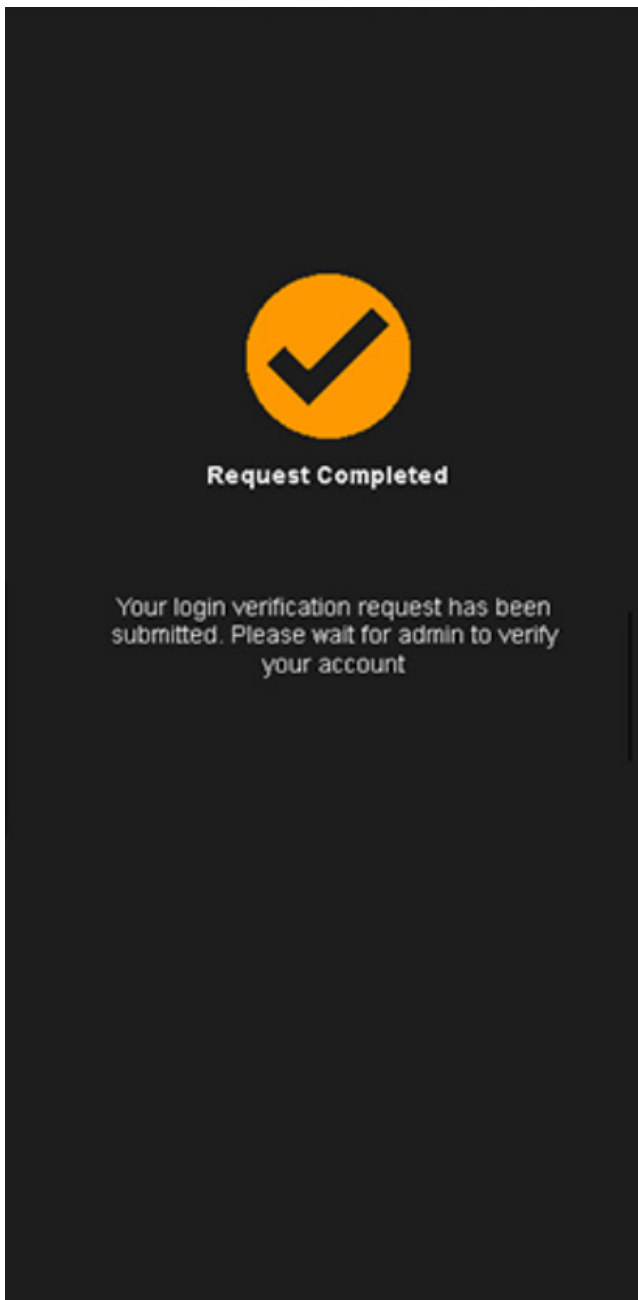

Tap to Record

8. To initiate the voice verification process, tap the record button to start recording your voice.
9. Read the provided phrase in a clear and moderate voice.

*** For Korean users, you will be able to see the sentence in Korean.

Note: Users must submit a clear and understandable voice recording. If not, click 're-record' to record a new voice recording.

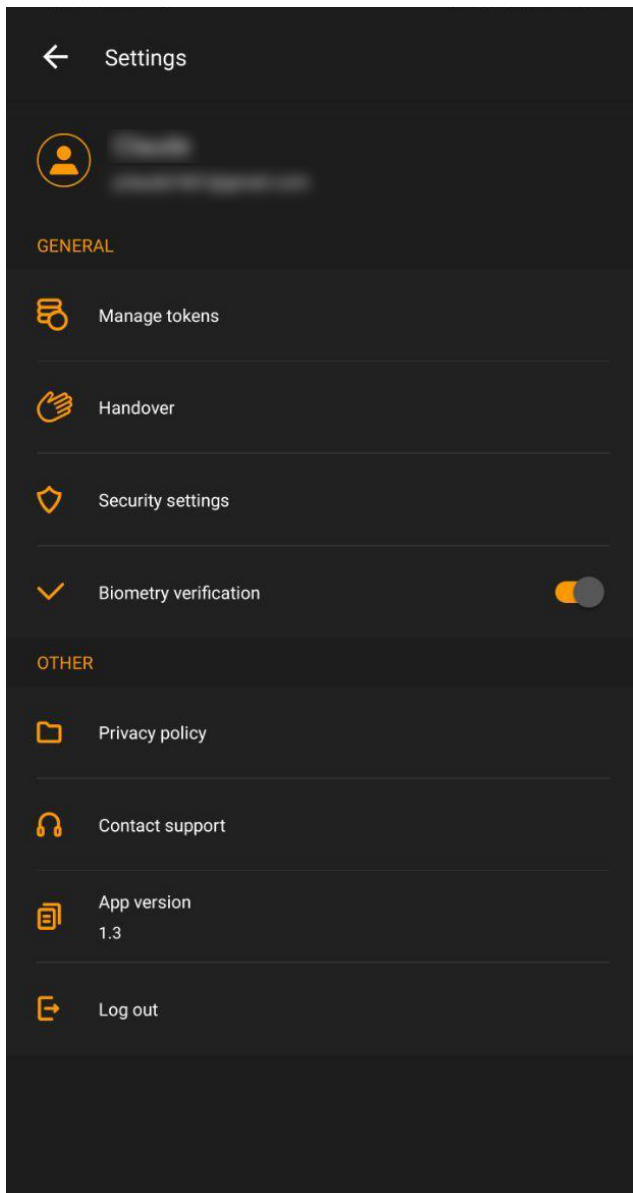

10. Once done, click Submit Request.

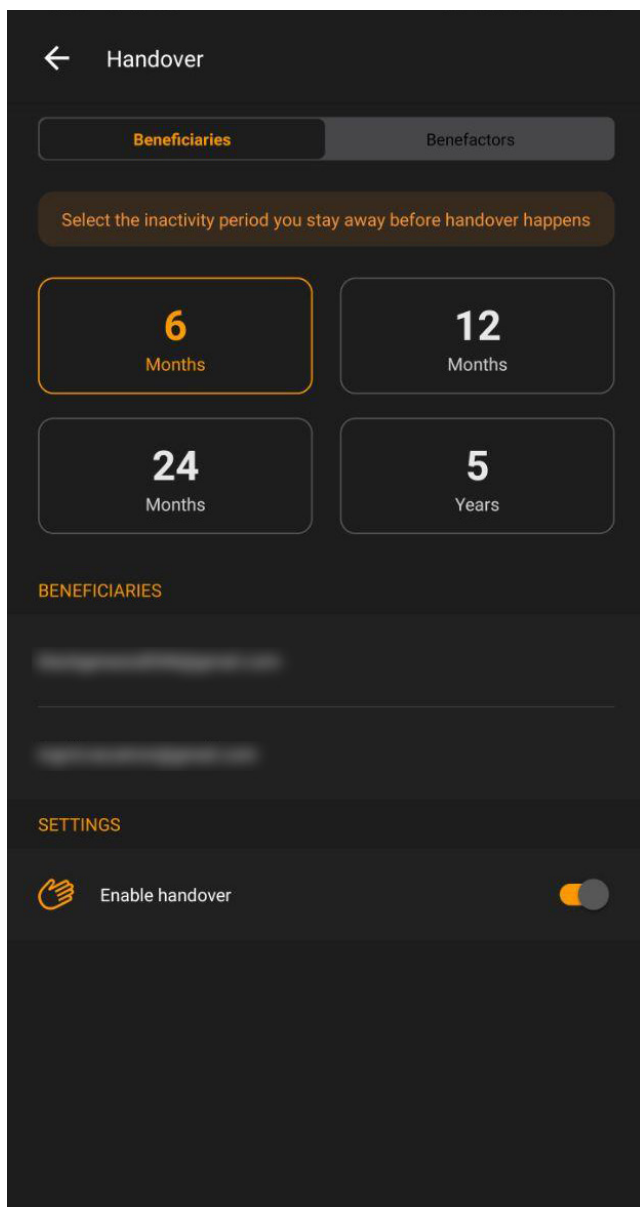

11. Your login verification request has been completed. Please wait for the admin to verify your account.

How to Enable the Handover Feature

Aladdin Pro Wallet offers users the ability to set up a handover beneficiary. In any case of deactivation or unprecedented events, the user's wallet fund will be transferred to the chosen beneficiary.

1. Click on the 'Settings' button to open the settings panel. On the settings menu, select 'Handover' to open customizable options.

2. In the Handover window, users will see the 'Enable handover' option below the screen.
3. Click on the toggle to enable and disable the handover feature.

Users must make sure of the handover feature is activated via the toggle button:

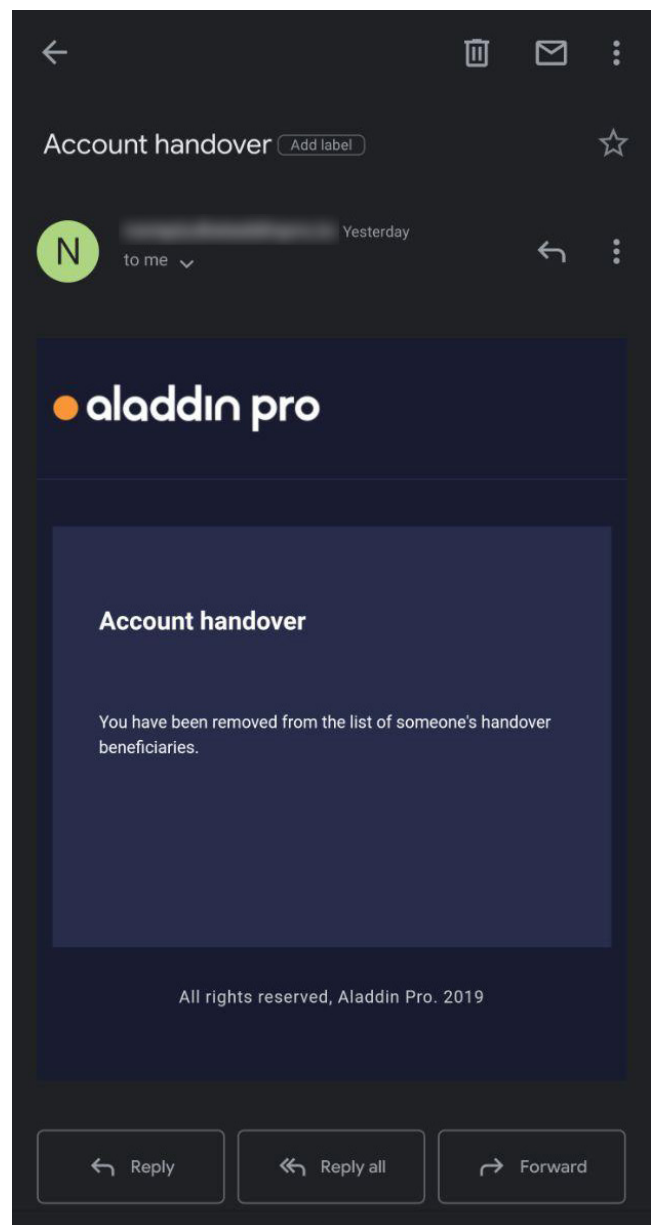

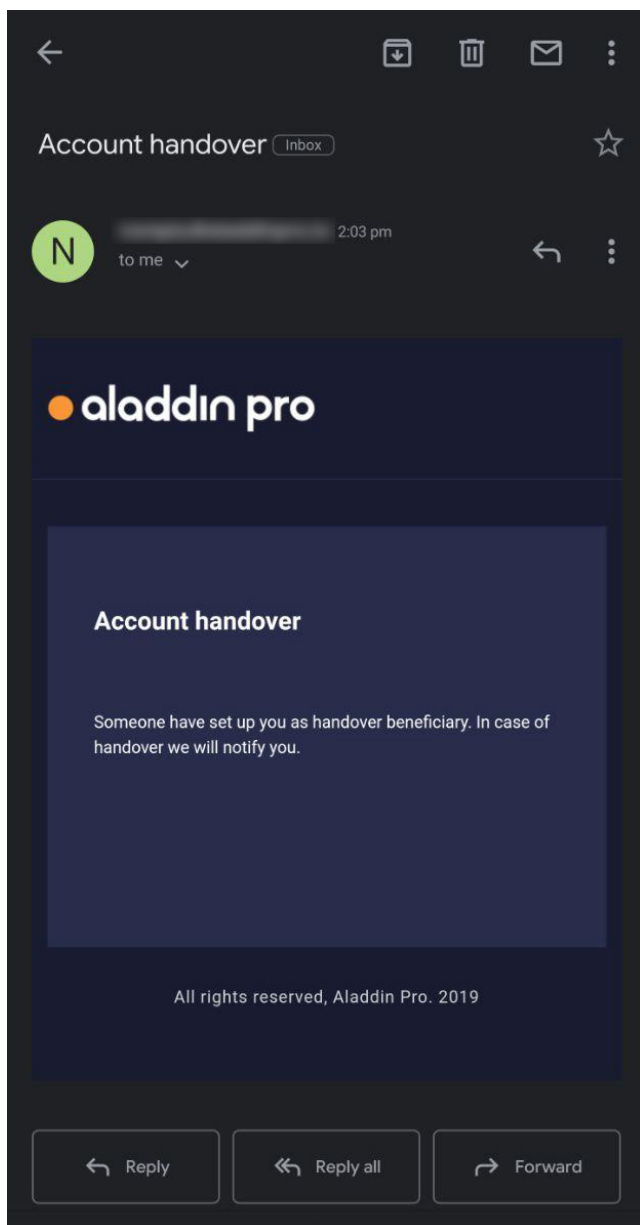

Enabled : Toggle button is on the right; and the orange color will appear to confirm it is enabled.

Disabled: Toggle button is on the left; greyscale means it disabled.

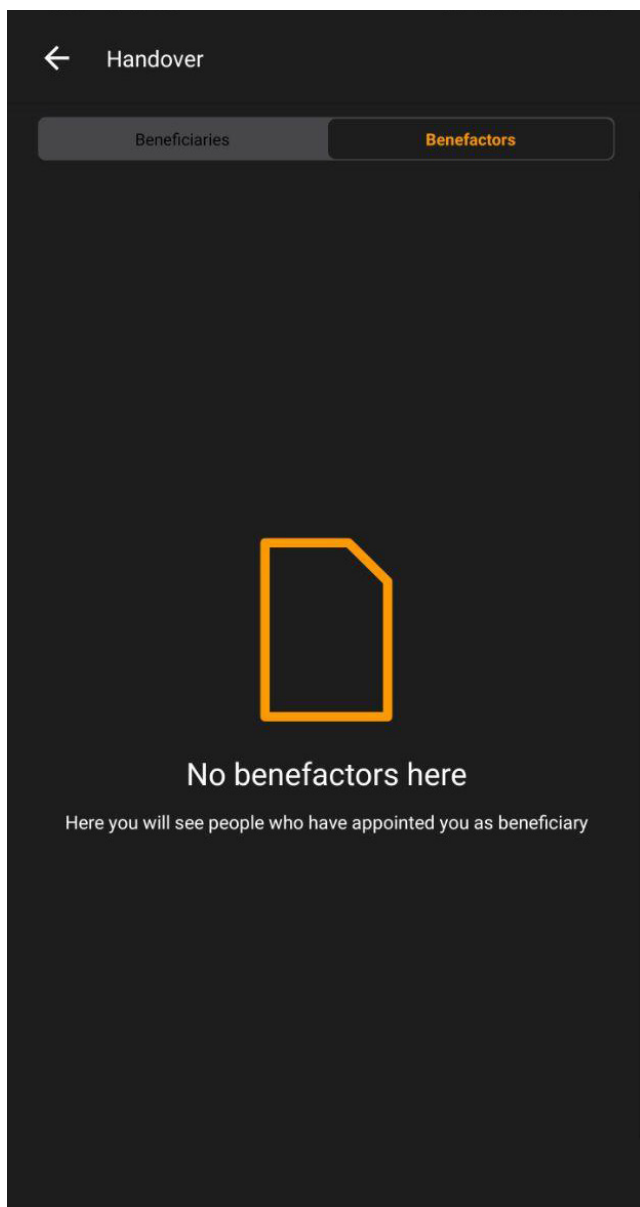

4. Users can select the app inactivity period before the handover gets activated:

6 months; 12 months; 24 months; or 5 years.

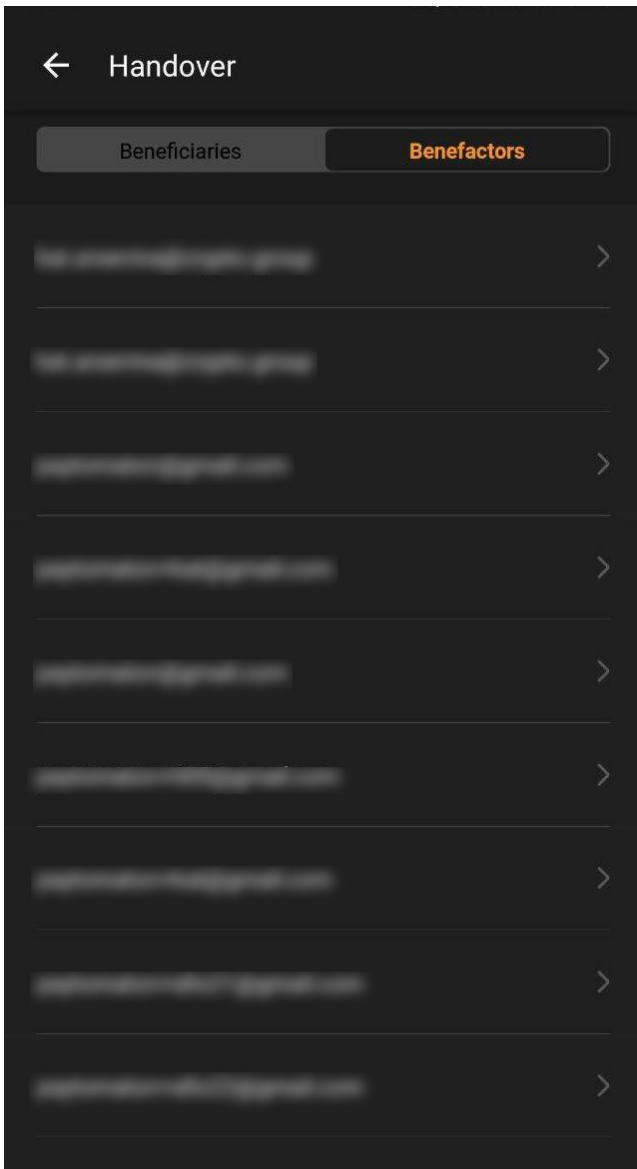

5. Users can add beneficiaries by providing an existing Aladdin Pro wallet registered email address and mobile number.
6. Once the Beneficiary email and phone number have been entered; click on 'Add Beneficiaries' to confirm.
7. A confirmation page will appear showing the email address and phone number of the beneficiary.

8. Beneficiaries will receive an email notification whenever they are added or removed as someone's beneficiary on the given email address.

9. Click on the 'benefactors' tab to view details of the user that has assigned you as their beneficiary.

- 10.** The beneficiary will be able to see the benefactors' name, existing Aladdin Pro email address, and mobile number. However, the information will only appear once there is proven inactivity from the side of the benefactor in the span of the chosen inactivity period.
